

# The Bank Maker System

Welcome to the Bank Maker System by Crypt.

Here's a little bit of information on who I am, what I do to make money, and how long I've been doing it.

Hi, well as you know me by my online alias, my name is Crypt. I'm a 16 year old high school student that's been making about \$20,000 a year for the past 2 years and for me, it's been a blast. Unlike other high school students, I wake up every morning, check my bank account, check my forum accounts, and then I get ready for school. I'm grateful that I never have to ask anybody in my family for money and that I can proudly say I support myself.

I've been on HackForums since 2012 by a Google search on how to hack YouTube accounts. When I discovered HackForums, I firstly went to the Hacking sections and started reading up on that. Then one day I realized that there was a monetizing section and from there, my journey to making my first \$10,000 online began.

I know for most people, \$10,000 may not seem like a lot, but when you're a high school student and you're making around \$1,700 a month, it's more than enough. Even if you're not in high school, \$1,700 a month can pay the rent.

Now before you continue I want you to realize a few things. I make about \$20,000 yearly using forums, but I created this system. You may make around \$10,000 yearly using forums or you may make a mere \$5,000 yearly using forums. I cannot guarantee that The Bank Maker System will make you thousands, but I can guarantee that if you keep try this method and you stick with it, you will earn money online.

Good luck,  
Crypt.

## Starting off with The Bank Maker.

In this eBook I'll be going pretty fast paced with everything to ensure you don't get bored from reading and that you hop straight into the method. There isn't any other way to put it.

What I realized is that if you can go to one forum and find a service / product that you can sell over other websites, you can then outsource / resell that service / product and make a decent amount online. The best thing with forums is that there's a wide variety options that you can choose from.

Let's take a look at a few threads that may be a potential money making opportunity.

These are some CS: GO inventory items that I can personally sell to my friends who play CS: GO for a decent amount. I usually like to sell virtual items for cash and then pay for those items with my PayPal funds or Bitcoin.

Another really big niche I find value in is social media boosting as a lot of people in my school are trying to get big on Instagram, Twitter, Facebook, etc.

My personal favorite though is included selling Minecraft ALT accounts in real life. They usually go for about \$0.10 – 0.20 and you can earn anywhere from \$5-10 per account you sell.

## How to execute The Bank Maker.

When you first begin using this system, you need to find an audience to target. This can be people around your community, in schools, workplaces, or even online. Once you have your target audience, start working on getting them to purchase your service.

For example, if you're trying to make sales at school, ask around and see if anybody is interested in purchasing social media services which you can easily outsource using this website: <http://getfamo.us/>

Just make sure that if you're trying to get people to purchase a service from you that you come off as professional and you give them a variety of options. If they don't want Instagram followers, offer them Twitter followers. If they don't want Twitter followers, offer them Facebook likes. You get the idea.

As I said with the Minecraft accounts, it's relatively easy to sell them using ALT account dispensers such as these: <http://altdispenser.com/> and you can also sell them on eBay.

Here's a seller on eBay who is selling 2 Minecraft accounts for \$4.99 (keep in mind that you can get a Minecraft account for \$0.20).

He's made about \$50.91 in a week of just selling Minecraft accounts on eBay.

You can do the same with Netflix accounts. Here's a seller who sold Netflix accounts for \$4.99 GBP.

That's about \$212.38 USD in a week when we convert the currency.

There's a lot of niches that you can get started in, but it's up to you to find out which niche you can dominate the best. In my case, I find all the niches extremely easy to use and therefore I have no problem offering a variety of different accounts on different sites.

I'll be using social media reselling as an example method to make sure that you understand everything completely. Please keep in mind that you can just change up the niche and it will work perfectly.

### Step 1: Find a niche.

I'll be using social media boosting as an example niche for this copy of Bank Maker. It's relatively easy to make about \$15 in your first day of reselling social media services, but I've personally seen people make \$150-300 a day once they dominate their niche. I'll talk a bit more about that later in this eBook.

### Step 2: Find a supplier for your service / product.

I already linked this website in this eBook, but I'll be using: <http://getfamo.us/> as my social media service supplier. This means I will have to market my service for a slightly higher cost in order to make profit off each sale.

### Step 3: Advertising your niche through websites, forums, etc.

I've been using HackForums to promote my service for a very long time and it seems to work out perfectly. The good thing about HackForums is that once you start making a bit of money you can invest into a sticky. Think of a sticky as a way to boost sales exponentially.

I recommend that once you start making about \$20-50 a day in sales to build an auto buy website or purchase one for social media reselling. This will make the method autopilot and will boost sales. You can usually get a social media boosting website created for \$50-75.

All you need to do is post a thread in the section of the market that you want to sell in.

Important Threads

I'll be using the Social Networking Services section for this example as my niche is social media services. You can either purchase the thread design or make your own. You can also go without a thread design, but I don't recommend that.

### Step 4: Providing the service.

Once somebody purchases a specific service (Minecraft account, Instagram followers, Netflix accounts, etc.) all you need to do is purchase the service for them and give them the service / product. Do not inform them that you are going to outsource their service or product as that may cause them to get angry which will result in a loss of a customer.

Here are a few forums I suggest you market your service / product on:
