

Thank you for purchasing my Guide.

Let's get right into it and

makeitwork :D

FileBucks Guide by makeitwork!

Filebucks is a site much like Uploading.com as it allows you to upload files and then pays you as you get others to download your files. The difference between Filebucks and other sites is that Filebucks will pay A LOT more. Filebucks pays 300 to 600 dollars for every 1,000 downloads, where Uploading.com pays around 5 dollars for every 1,000 downloads. What I am going to show you right now is how you can grab a hold of Filebucks and make AT LEAST 50 dollars a day from it!

So first if you have not yet done so, Click here <http://www.filebucks.org?ref=Mjk5OTY=> and sign up for an account. There is no fee to sign up and it takes a few minutes to do so

Now you should familiarize yourself with the site so take a good 5 minutes or so to look around. Note the Upload button on the side, that is where you will go to Upload your files.

THE METHODS!

Now I have spent some serious time developing these methods and making them work. Some are quick and easy and will bring

some good cash while others will take more time, but will bring unbelievable cash!

Method 1: Youtube

This is an easy way to get started. People will download anything from youtube. So to get started make sure you have an account with youtube. Next go over to daily motion and find a good strip tease video where the girl gets naked at some point in the video. Download the video from daily motion using www.keepvid.com and fire up windows movie maker. The idea is that we want to post the video up to the point where it becomes obvious that the girl is about to show off some skin (boobs or bottom half) and then we cut the video right there. Now what your going to do is upload the cut portion to youtube. Since there is no actual nudity in this video (since you cut it out) youtube will not take the video down. Upload the entire video to filebucks and put the link in the description box next to your video. Give the video a long sexy name and watch as people download the entire video from your link in order to see the girl naked! Tons of people search for girls on Youtube so your videos will get plenty of views very fast.

Method 2: Orkut and Myspace method

Signup to yahoo and myspace account. Make around 300-400 friends on them. It will take little bit of time but you can do it easily if you spend around 1 hour daily on that and add around 50

persons a day. Its not so easy but its not even so hard. I got around 500 friends within two weeks.

Most important thing: Concentrate only of UK, US and Canada people because filebucks only pays for these countries signups. It would be much easier for you if you join US and UK communities. If you are comfortable then try to make your profile by a girl's name.

Mostly people add a girl more commonly than a guy.

After creating a ID with 400-500 friends. Add your uploaded pic in your profile or update status.

For example: Create a notepad file. Clock it with your Filebucks link and add in your profile. Encourage peoples to download your file by saying that this is your phone number, coolest or sexiest pic of yours, or be wilder like this is my nude cam show download it. There will be many hornies there to download your stuff.

Update your profile daily and keep on adding more US and UK friends.

Method 3: Forums are your friend!

Ahh yes forums my favorite place to get downloads from. So what we're gonna do for this method is find any porn forum and copy a few porn passwords that people post up. If you just look around at a few places like <http://forum.dumpstersluts.com/> you'll find a few passwords. Now go ahead and copy those passwords into a text document and archive it with winrar. Here's where we're going to do things a little differently. Most people will go and outright post these files on the forums with your download link. Now this will bring in a few bucks, but when the passwords run out or someone sees a few postings about how they already use these passwords, your thread is pretty much dead. Instead your going to sign up to as many porn forums as you can and place your download link in your signatur with anchor text such as "Free GangBros Passwords." Then just post all over the place saying things like "Wow nice video" or "Thanks for the videos" stuff like that so people will see your name and signature. If the forum will not allow your download link in the signature just make a free blogger blog with the download link on there and have your signature redirect them there with the same achor text. You will

see huge traffic with this method, trust me everyone wants free porn passwords!

Method 4: Roms and Emulators

This is my biggest money maker by far, and its actually pretty easy to set up. The only reason that this is the most advanced method is because it requires a few things such as a website, hosting and some experience in creating a website and making it look decent. If you can make this method happen you will see a huge amount of downloads come through. What you do is search for Nintendo ds roms and emulators in google. Now when you find a good site just download as many as you can. I use a few sites to download ds roms, but starting up I just went to minion and downloaded a huge file with like 100+ ds roms. This got my site off the ground much faster and took the hassle out of downloading a 100 or so files seperately. Just upload all the files to Filebucks seperately and post them on your new website. If you keep your site updated with new releases you can get a couple thousand downloads in a day easy. If you submit your site to any of the top 100 Rom lists you can get some awesome traffic that way. Alternatively, you can submit to digg and reddit claiming that you've found the best DS Rom site on the web. Just remember to put a disclaimer on your site stating that all roms downloaded need to be deleted within 24 hours unless the legal copy is owned. That statement will keep your rom site legal so don't forget it!

Method 5: Digital Comics

Digital Comics are very popular on the web currently, and no one is using Filebucks to promote online comics. There are a few things you can do here. For one you can visit

<http://www.lorencollins.net/freecomic/> and download a few comics and then post them on a blogger blog. Of course digg traffic works well here since comics usually cost money to download online. Another way to explode this is to use a site called 4chan.org. Now what you do is visit the comic section pick a comic book you downloaded and post the front cover and then next to that post the download link. A small description will help with this and get a couple people commenting on it. Again everyone loves free comics and 4chan is a great place to get your comics downloaded.

Method 6: Exploit Lazyness

This is probably my favorite method just because its actually very creative. What you need to do is go to any manual traffic exchange (look on google you'll find a ton) and sign up to a few. Upload a large picture or any small program that is about 1 to 2 megs in size and name it "Traffic Exchange Bot." Make a quick blogger blog and delete everything from the page except for the post and title. Make The title large and the body easy to read. State that you have a free traffic exchange bot that they can have to use for the traffic exchange they are on. You can customize the page and make one for each traffic exchange you use. People will download the file hoping for a bot, even if you don't have a bot for them to download once they download the file and see that its not a bot they will more than likely just move on with their traffic exchanging while you just got a download out of it! Make sure you .rar the file that you upload so it appears believable. You can participate in the exchange to get credits or just buy some, either way you will get conversions easily since everyone hates having to do manual traffic exchanges.

Method 7: Current Blackhat Niche Method: Michael Jackson of course!

Download a dramatic looking picture of Michael Jackson (A close up of his face or whatever) and edit the photo by placing a caption of a quote and his life span (1958-2009 or whatever). Throw up a blogger blog saying everyone should pray for Michael Jackson and download this picture and put it as their background for their computer. There are way to many nuts out there for this not to work! Put a link to it on digg and reddit with a title saying something like "Support Michael Jackson's family, download this picture and place it as your background. Pictures honoring the king of pop" Just remember to make your title as long as possible and you'll be fine!

Method 8: Take help of websites or blogs

It was the simplest method and yet most reliable method. If you have a good website which got around 1K-2K visitors per day, then create a simple banner and clock it with your Filebucks URL. Try to give free eBooks related to your niche. Peoples just love free stuffs. For getting free eBook or something you can simply search on google, rewrite the whole content and then go. If you want to be bully then simply copy paste that method and give it for free. Ask your friends to place your free stuff clocked banner of URL to place on their websites or blogs.

Method 9: Make your website or blog especially for Filebucks

People just love free stuffs. When you are start getting some

decent money from Filebucks, just invest in buying a domain and hosting and make website dedicated to downloading free stuffs. SEO it regularly or to improve traffic always do yahoo answers posting along with link back to your website. Just don't spam them otherwise you will be punished.

Conclusion

That's all for Filebucks I hope you enjoyed this report, now get out there and make it happen! With these methods it'll be hard to not make \$50+ a day unless you just don't take action! So now is the time to take action!
