**Now that we all agree lets get started!**

## The Method's

**Hello, now that I've sparked your interest lets get started with the how your going to make money.**

**What you will need.**

**BTC. Why do you need BTC? Because we will be utilizing the Bitcoin Casinos. If you do not have any BTC you can exchange with people in the Currency exchange section.**

**This method utilizes : <https://satoshibet.com/roulette>**

So lets get started with the 2 methods

## Method #1:

Head over to <https://satoshibet.com/roulette>

The first method we will be utilizing is the Five Quad Strategy

With this strategy you will make five quad/corner bets along with a single straight up number. With this betting pattern you are covering 21 numbers on the layout. If you select a straight up number that is included in one of your corner bets, you will only be covering 20 numbers. You will put a single chips on each of the following corner bets:

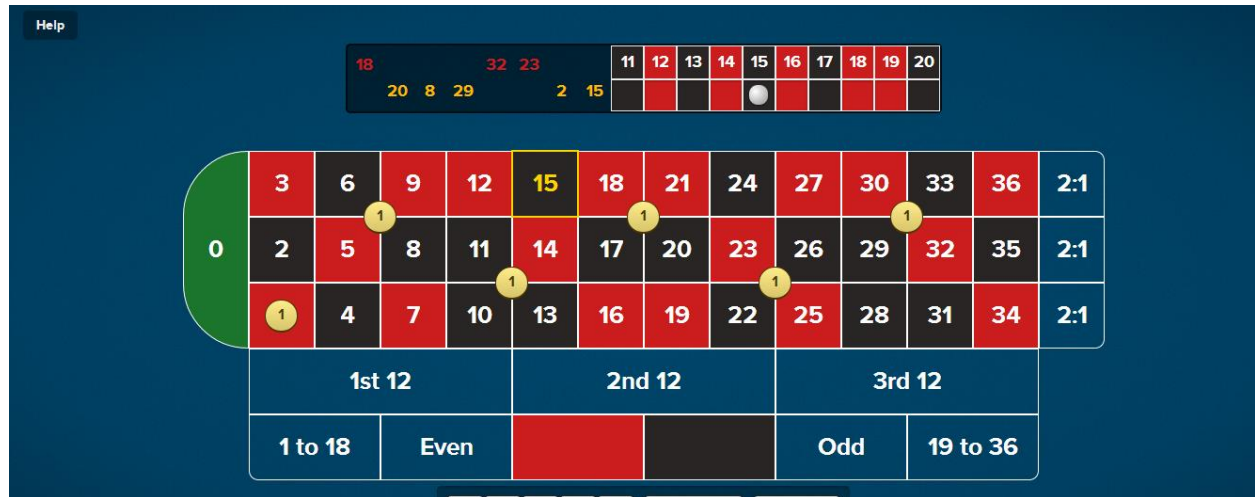

5, 6, 8, 9  
10, 11, 13, 14  
17, 18, 20, 21  
25, 26, 28, 29  
32, 33, 35, 36

Bet one chip on your favorite straight number. (ie 5)

The quad bet pays 8 to 1 so if the ball lands on one the numbers in any of you quad bets you will collect will make a profit of three chips. You collect eight but lose four on your other quad bets and one on your straight up bets.

The straight up number pays 35 to 1. If the ball lands on your number you will have a profit of 30 chips. (You will lose five chips on the five corner bet.)

How it should look like is this:

Now you're probably thinking why does this work. Well its simple. Its because you are taking advantage of the fact that you can cover over 20 numbers. And if one of the number hits, you make a higher ratio to what you will lose. So even though it seems like you are not making much of a profit, you will. It will slowly start to increase over time.

Of course when you start this method don't start off betting 1 like me. Start low like .1 or .025. Your chances of lasting longer will become higher.

## Method #2

The second method we will be utilizing is the Double Street Quad Strategy

Head over to: <https://satoshibet.com/roulette>

With this strategy you will make wagers on two Double Streets, and one quad or corner bet and one straight up number. By using this betting pattern you are covering 17 numbers on the layout and there will not be more than five adjacent slots on the wheel that are not covered.

You will be wagering six chips per spin. You will put two chips on each of the double streets and one chip on the corner bet and straight number. You can select your favorite number to play straight up. I like to play the number five so here are the numbers I use.

Two chips on the double street to cover: 10, 11, 12, 13, 14, 15

Two chips on the double street to cover: 28, 29, 30, 31, 32, 33

One chip on the corner to cover: 17, 18, 20, 21

One chip on the number 5. (You can pick your favorite number but it should be one that is not covered by one of your other bets.)

#### The Pay Off

The double street pays 5 to 1. You have two chips on it, so you will collect ten chips if the ball lands on one of the numbers covered by your double street bet. You will have a profit of six chips. (You will lose four chips. Two from your other double street and one from your quad bet and one from your straight up bet.)

The Corner/Quad bet pays 8 to 1. If the ball lands on one of these four numbers you will have a profit of three chips. (You will lose four chips on the double street wagers and one chip on the straight number.)

The straight up number pays 35 to 1. If the ball lands on your number you will have a profit of 30 chips. (You will lose four chips on the double street wagers and one chip on the corner bet.)

It should look like this:

0	3	6	9	12	15	18	21	24	27	30	33	36	2:1
	2	5	8	11	14	17	20	23	26	29	32	35	2:1
	1	4	7	10	13	16	19	22	25	28	31	34	2:1
1st 12				2nd 12				3rd 12					
1 to 18		Even						Odd		19 to 36			

Again, it may seem like you're going to be losing a lot more than your spending but you're not. The amount it pays out is far greater than what you spend.

Now that I have added an autopilot script made by my mate Boss, this method is now 100% automated!  
Now you can enjoy making money while sleeping! Its so easy!
