

# INCOME NUKE

<http://HackForumsLeakz.blogspot.com/>

Welcome to Income Nuke.

You've taken the first step to absolutely **exploding** your internet profits. I can promise that every single one of you that purchases this eBook will earn a consistent online income. Not only that, but I have included quite a few additional methods (more will be added in the future) to increase your earnings even further! That means, if one method doesn't work for you (for some reason), then you can just try another.

It should be noted that the methods are not theories. Judge them as one and you will never succeed. Everything that has been included has been personally tested by me as well as other monetizing experts.

The main methods included are ones related to **outsourcing**. What exactly is outsourcing? Well, as defined by *Entrepreneur.com*, outsourcing is defined as...

*“The practice of having certain job functions done outside a company instead of having an in-house department or employee handle them; functions can be outsourced to either a company or an individual”*

In simpler terms, outsourcing is when you offer a service or product, and are acting as a middleman for the actual seller. Outsourcing is used by very large companies around the world, including Microsoft, Apple, Google, and more.

If you're confused, don't worry. More will be explained later on. So, grab a drink, get comfortable, and get ready to learn the methods I used to earn an online fortune.

# Outsourcing Social Media Services

Social media, in today's society, has become an almost vital aspect to our everyday life. Facebook, Twitter, Instagram, Vine, are all networks millions of people around the world use on a daily basis.

If you didn't already know, plenty of websites and people sell social media boosting services. For example, people sell Facebook likes, Twitter followers, Instagram followers, and more. People and businesses purchase these for personal use, as well as to give themselves a better company image.

We are going to outsource work for ourselves to turn a profit. We will be reselling social media services, from providers (I'll teach you how to find them) to earn ourselves money.

This method is divided into two sub-methods. Both can earn you massive amounts of profits every day.

Our first method will require a Facebook, Twitter, Instagram, any social media account that has a decent following. For Facebook, you can use your personal one as long as you have a decent of friends you know in real life. Twitter and Instagram accounts with a large amount of followers can work as well.

Basically, we will be selling social media services to our friends or to people we know through social media networks. Let me show you.

The first thing to do is find a verified and reputable social media seller that we can buy from. There are two websites I'd recommend using to find a seller, and those are HackForums and Fiverr.

HackForums is a great place to buy social media services as, not only will you be

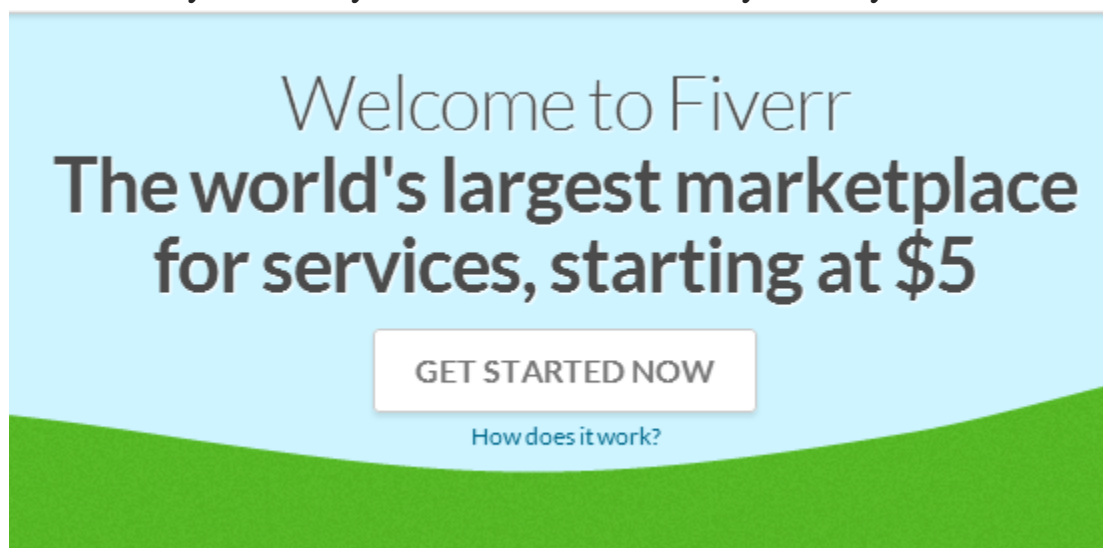

able to find cheap prices, but most shops are very highly vouched and trusted. You will not have to worry about being scammed if you do your research.

Check out some of the shops that have a decent amount of pages of replies. Take your time looking for a shop. Make sure to choose one that has low prices, but also no negative reviews.

Another website you can use is Fiverr. If you haven't already heard of it, Fiverr is a website where you can buy services of a wide variety for only \$5.

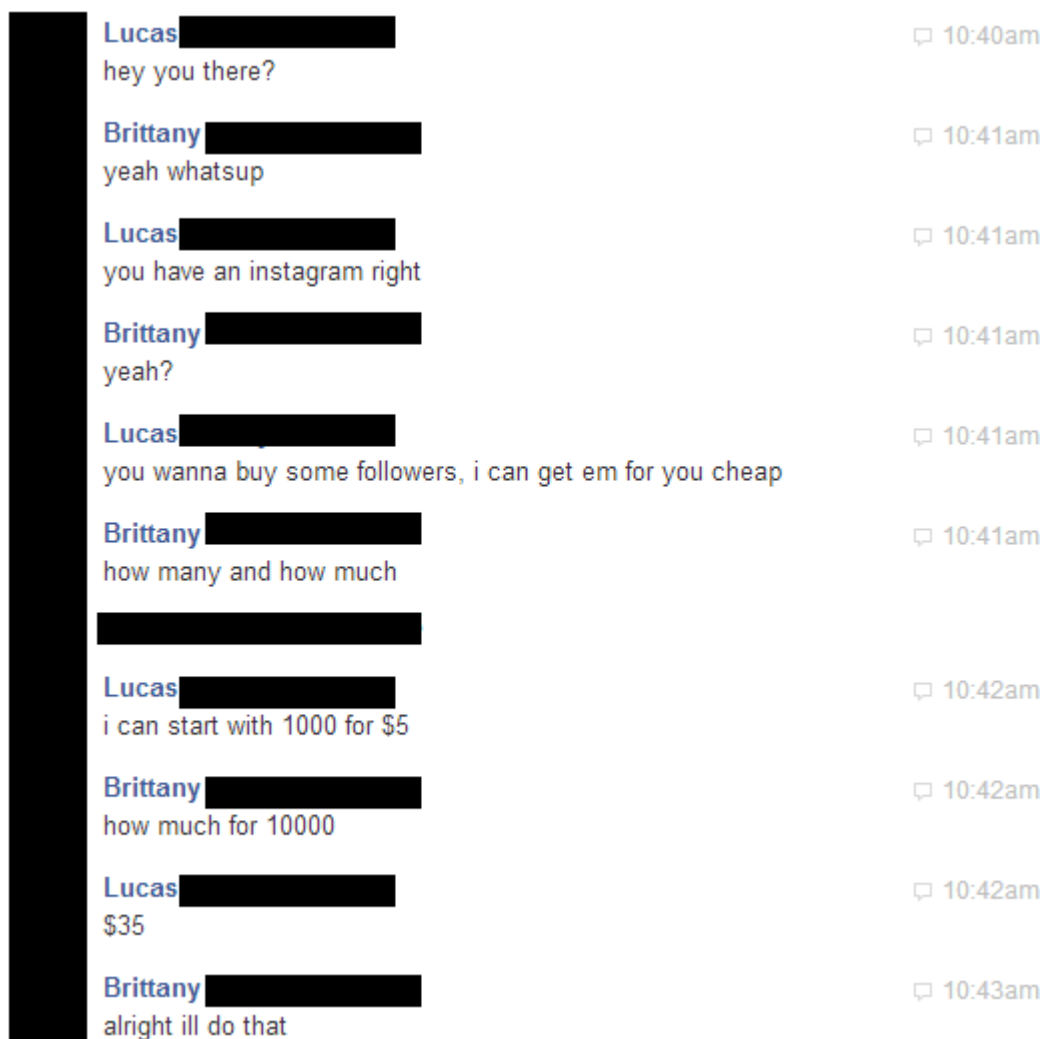

Simply type into the search box a social media service. Something like "Twitter

Followers” or “Instagram Followers” and you’ll find dozens of results. I recommend HF over this as Fiverr does not always have the best prices. It is also harder to stay organized, whereas on HF you can easily find all the services in one person’s shop.

Now, I will teach you where you can sell these services!

The first place is on Facebook. I’m sure tons of your friends would be interested in social media services for Facebook, Twitter, Instagram, etc. Heck, look at this, only took two minutes of work!

Now, this will work for some friends and not for others. I already knew this girl ran a popular fitness Instagram, so it does require a bit of thought. You can collect cash, or also PayPal or even Bitcoin for your services, depending on how tech

savvy your friends are. Simply send your friends list a mass message saying something like, “Selling Instagram followers, Facebook likes, Twitter retweets (or anything else you want to include) for cheap! Reply back if interested :D”

The rest is simple enough. Collect the money from those interested, and use it to purchase the social media services for them on HF or Fiverr. Have all your customers provide you with their social media link and any other information you might need to get the job done.

The second method is about reselling social media services on eBay. This is a much more consistent way of earning than the first method, as there will always be people interested in buying. With this, you can easily make upwards of \$500+ a week.

Login to your eBay account and create a new listing. Make sure you select the category, “Web & Computer Services > Other”. Create your listing there. Make your listing as professional as possible. Add a picture of the network you’re promoting (eg. Twitter, Instagram), write a detailed description. Check out some other seller’s listings and undercut their prices by a few a dollars as well. Formatting is up to you, just make it clean, professional, and detailed.

Whenever someone buys your listing, simply email them asking for their social media link. Then, once you have it, just go on HackForums or Fiverr and buy the service for them. And that’s it! You provide them with the service, and you pocket the difference in profit.

# Outsourcing

In the previous method, I briefly described outsourcing as a method to make money. However, there are tons of opportunities for you to outsource work. Some can be very simple, some can be very complex. I will be sharing some of my personal methods that I have used in the past.

## Outsourcing Graphics Work

This is a very general topic but I will write on what I personally did. Basically, I offered a service on other online forums (such as DigitalPoint, Freelancer, etc.) regarding graphic design. I would find clients interested in graphics design services on other forums/sites. Once I had found a customer, I would look on HackForums or any other site I know I could find designers who could complete the job, and would outsource the work to them. Basically, the workflow is...

Find client on external site -> Find designer able to fulfil client's needs -> Collect payment from client -> Pay designer -> Profit

We will be selling the designers services at a marked-up price in order to turn a profit. Plenty of designers on Freelancer are willing to do work like this, but you can also look around on HF or some other sites.

### Outsourcing Copywriting Work

Just a note. Copywriting is very different than copyright-ing. Copywriting essentially means writing an article (or anything really) for marketing or advertising purposes. There are tons of businesses on Freelancer, DigitalPoint, and even HackForums interested in content writing services. We will use other sources copywriting services to outsource the work and turn a profit.

<http://www.blackhatworld.com/blackhat-seo/content-copywriting/647089-money-site-content-outstanding-quality-great-prices-keyboard-warriors.html>

Above is the source I used for all my copywriting services. Again, the workflow is as follows

Find client on external site -> Pay copywriting service to fulfil client's needs -> Collect payment from client -> Profit

Seems simple enough, right? You can often find repeat customers that will be interested in purchasing again and again from you to write or rewrite articles for their websites. In these cases, it can mean big profits for you.

# Outsourcing SEO Services

SEO stands for Search Engine Optimization. It means boosting a sites rank on a search engine (typically Google). Many services offer to boost site rankings for a price. One of which is listed below, one I used for outsourcing in the past:

<http://www.blackhatworld.com/blackhat-seo/seo-packages/654231-captain-jack-sparrow-returns-23-phases-search-engine-optimization-social-media-page-optimization.html>

We can find clients interested in SEO services on WarriorForum, DigitalPoint, Freelance.com, even HackForums. Simply by outsourcing the work to SEO providers (like the one listed above) we can turn out a very large profit, as these services typically sell for quite a bit.

The workflow is as follows:

Find client on external site -> Pay SEO service provider to fulfil client's needs -> Collect payment from client -> Profit

This is the most profitable out of the methods listed as these services typically sell

for the most money. Even with a very small markup (which is entirely up to you), you can turn a very large profit.

# Concluding Thoughts

Now that you have reached the end of Income Nuke, you have everything you need to start earning yourself an online income. Don't just sit on your ass, go out and start earning some money!

If you need any help with setting things up or just have some general questions, do not hesitate to email me at [IncomeNuke@outlook.com](mailto:IncomeNuke@outlook.com) Elite package customers will be able to add my personal Skype (kreature.business) for 1-on-1 support and assistance.

All contents of this eBook are protected under copyright law. You are not allowed to copy, redistribute, or resell the contents of this package without my explicit permission.

All eBook packages are stamped with HWID, IP, PayPal email, as well as other information. I will know exactly who leaked the eBook, and when. Doing so will result in a dispute filed on HackForums as well as PayPal.

I want to thank you again for your purchase. Now get out there and start earning!

**To your success!**
