

## WELCOME TO THE EBOOK THAT WILL GIVE YOU AS IG LIKES AS YOU WANT!

### •What do we need?

For this method, we will need an Android rooted phone, but you can use [Bluestacks](#) aswell(in fact i use bluestacks).

### •What we have to download?

We will be downloading 2 apps:

One is an app that allow us to get coins when we like other users IG photos to invest that coins in likes to us.

The other app will give us unlimited coins with no work.

### So, what we do now?

Now the steps are so easy that you won't need images :)

1. We will open InstaLikes and log in our IG account.
2. We close InstaLikes and we open CheatDroid(if you are on an android device, make sure it's rooted).
3. On CheatDroid we will have a list of all the apps installed on our device. We will search for InstaLikes app. Then we will tap it.
4. We will see lots of "XML" files, and we will press the one named "UserPoints" (you can guess what we are going to do now).
5. When we have tapped it, we will be tapping again the textbox "[int] Userpoints".
6. Now is so easy! Just put a big amount of points like 10 thousand(trust me, don't put a bigger amount, just if you run out of points, do this again) and press save :)
7. Then head over InstaLikes (if coins doesn't appear kill the app and open it again) and spend you coins in getting likes in your images! DONE! :D

## **WARNING!**

I don't recommend you getting more than 500 likes in one order to a photo, just do it lot of times with any amount between 400-600.
