About MoneyBot

Thanks for buying my eBook. In this eBook I'll show you how to make **at least** \$100 a month with no work at all, while fully **auto pilot**!

The possibilities for this eBook are endless! Depending on how creative you are, you can earn tons more money with each and everyday!

Requirements

- 1) This eBook
- 2) \$40-50 **starting off** (will be explained later)
- 3) \$25-30 **month fee** (will be explained later)
- 4) Decent computer
- 5) About 5-10 minutes each day to check on it
- 6) Time to learn

What we are working with

We are botting in a **MMORPG** (Massively Multiplayer Online Role Playing Game). With the amount of **in-game currency** you will be getting, you **WILL** be guaranteed to make back any fees or money which you pay to use the programs mentioned. This will never get saturated as there will always be people buying the in-game currency, and even if you can't find normal buyers, you can always sell to trusted Chinese websites that pay you instantly.

What will get me **in-game currency**?

- Farming pure **gold**/currency
- Farming **materials** for crafting and selling it off in marketplace
- Level up high level account and sell **services**

Explanation of the fees

- 1) \$40-50 **starting** off will be for the game (\$30-40) and 1 month of the bot for it (\$10-15)
- 2) \$25-30 **monthly** fee. Some games costs \$15 a month to play, while others will be free. This means that you will save the \$15 to use for something else! The rest \$10 will be used for the bot.

Where do I start?

Right now the game which I am botting in is called Final Fantasy XIV by Square Enix. I pay \$15 a month + \$10 for the bot, which equals to \$25. Each month I make about \$150 from it, so I get the \$25 back + \$125. This means that for about 5-10 minutes of work each day, in a month I would have spent around 2 hours, for \$125. That's a pay of **\$60/hour!**

Do you want to **earn more**?

It's easy! The only thing you need to do is to buy more copies of the game, set up new bots, and each bots will bring you in approximately the same amount each month. For example, 5 bots will mean $\$125 \times 5 = \625 a month!

I'm having **trouble** starting up the bot, what should I do?

If you are playing FFXIV, contact me and I'll help you set it up.

What **games** should I bot?

My recommendations are:

- **Final Fantasy XIV** by Square Enix

Games I would **stay away** from (currency prices too low)

- MapleStory
- Diablo 3
- Rift

Where do I **sell** my in-game currency?

- <http://www.zamgold.com/>
- <http://www.ige.com/>

I got banned!

Sorry about that, you were probably botting in places that are too obvious, or too many people reported you. You can always try to appeal it but overall, the only thing you can do is restart.

Thanks for reading and buying the eBook. If you have any questions at all please feel free to PM me here:
