

zeroday's DOXING eBook!

In this eBook you will learn how to DOX pretty much anyone, I'm not saying you will become a professional immediately, but I'm sure you will learn something from this. Please read the entire eBook or you might miss something important. I have been DOXING for 3 years and I usually never fail, I'm considered a professional at this so pay attention.

- **What is DOXING?:** DOXing is a technique of tracing someone or gather information about an individual using sources on the internet, it can be used to your advantage or as a precautionary defense mechanism.
- **What can I do with a DOX?:** You can do a lot with a DOX on someone, you could completely ruin that persons life if you wanted to. I will list later on some things you can do with a DOX and how.
- **Can I get in legal trouble with a DOX?:** Yes and no. You can't get in trouble with someones information as long as it doesn't contain a Social Security Number (SSN) or credit card information etc. However, you can get in trouble if you post information of a minor online or use the information for illegal purposes.

Chapter 8: *How to find information on a House*

Chapter 9: *What to do with a DOX.*

Chapter 1

DOX TEMPLATE

When you start a DOX you are going to want some sort of a template or you're just going to be confused and the information is going to be unorganized and all over the place and you will eventually start cutting. I will be providing you with my template, you can add/change this template however you want.

--- Personal Information ---

Alias:

Name:

First Name:

Last Name:

Sex:

Age:

Birthday:

Skype:

IP:

ISP:

Email(s):

YouTube:

HackForums:

Any other SM:

BTC Address:

OMC Address:

Country:

State:

ZIP Code:

Postal Code:

Area Code:

Phone Number:

Address:

Father:

Mother:

You can edit this DOX however you want or just come up with your own, it's just a template I use, I'm not telling you to use this, whatever is easier for you.

Chapter 2

HOW TO START A DOX

Now that you have a DOX template you can start your DOX with ease. Pick the target you want and grab whatever info that you know already, this could be a Skype, an IP, Email, anything it doesn't matter what you start with. The information you have will lead to more information leading to more and so on, there are cases where someone is undoxable but that is very rare. Once you have decided to DOX someone then you need to find all of the information of this target. You most likely have contact with this individual over Skype a game server or some sort of Social Media. The first thing you need to do is grab all known information you know about this target and put it in a text document with your DOXING format. This can be his Alias (What he goes by), His name, his Skype, age, anything listed on his profile you have contact with. Be sure to look through all the targets posts/threads on his account, whatever it may be. If you know any of the targets friends, you could also grab information from them if they're willing to give it.

Now, you might think this is going to be easy, no it's not. It's not going to be anything where you pull up a little program and type in their name and it gives you all their information. No. You have to work for it and I'm going to teach you some ways (not all) on how to get that information.

Please note, before you do this think about what you are doing. I am not liable for your actions. This is for educational purposes only. If you do something illegal with this that is all on you and you have been warned. Don't just DOX someone for "fun" or just to get your little dick wet for 5 minutes and act like a God and show off to all your friends. It will backfire right on you and you will regret it. I promise you that. So think about this before you do it.

You HAVE been WARNED.

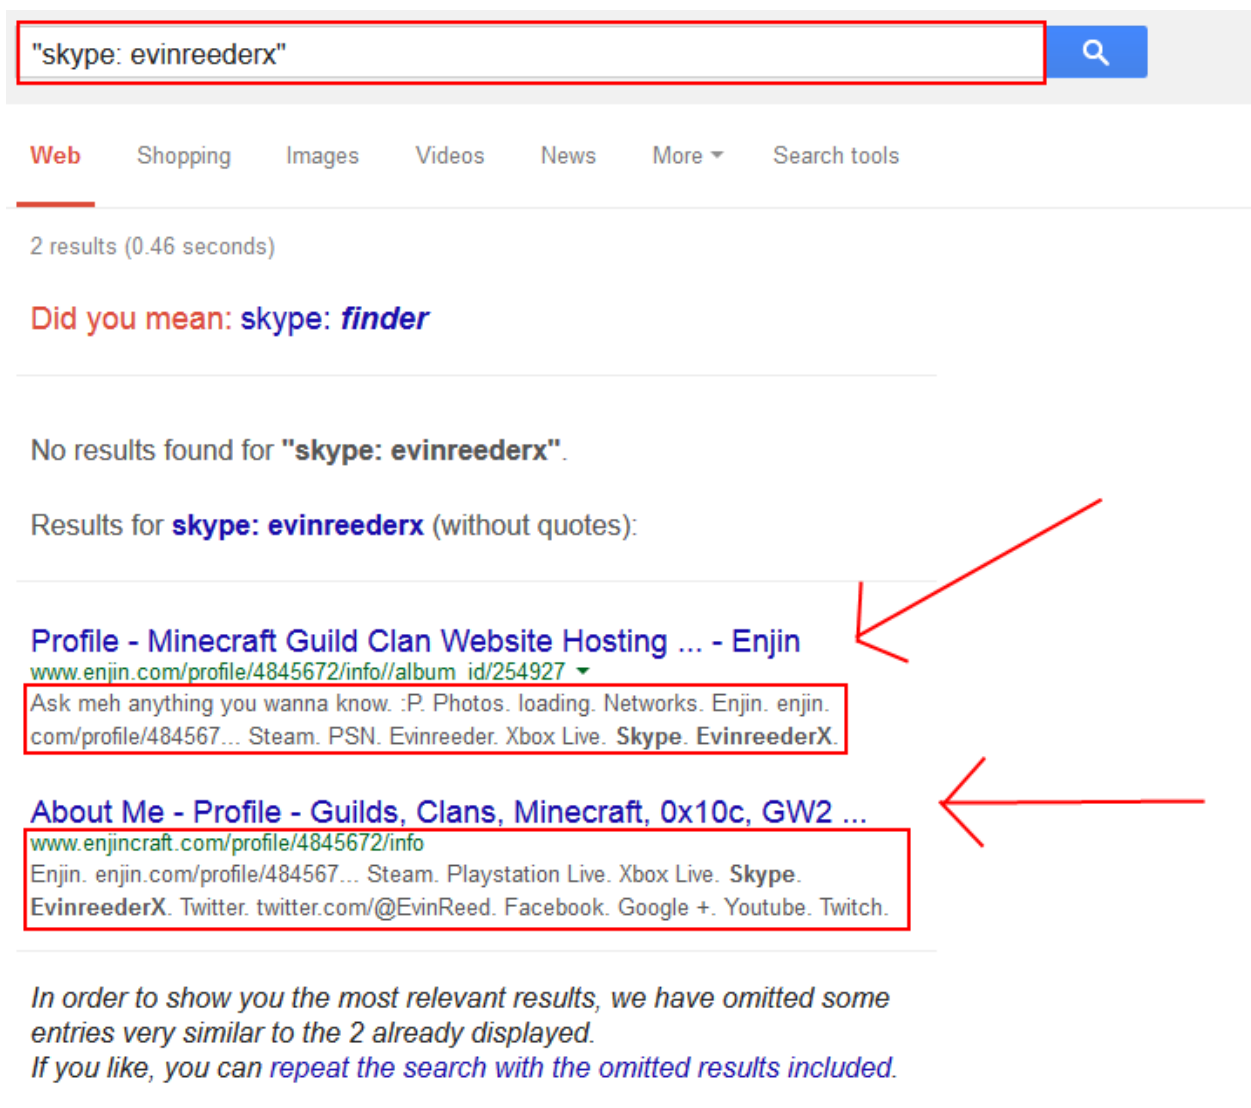

Chapter 3

HOW TO FIND INFORMATION FROM A SKYPE USERNAME

In this chapter I will be showing you how to grab information from a Skype username, I will be using a person I have DOXed in the past for an example.

Let's start by finding out where the targets Skype has been posted throughout websites and forums and so on.

Go onto <http://google.com> and type in the following in the search bar: "skype: usernamehere" be sure to use the quotes or this will not work. I will post an example below.

The screenshot shows a Google search interface. The search bar contains the text "skype: evinreederx" and a magnifying glass icon. Below the search bar, there are tabs for Web, Shopping, Images, Videos, News, More, and Search tools. The search results show 2 results in 0.46 seconds. A suggestion "Did you mean: skype: finder" is displayed. Below this, a message states "No results found for 'skype: evinreederx'." followed by "Results for skype: evinreederx (without quotes):". Two search results are shown, each with a red box around the text and a red arrow pointing to it. The first result is "Profile - Minecraft Guild Clan Website Hosting ... - Enjin" with a URL "www.enjin.com/profile/4845672/info//album_id/254927" and a description "Ask meh anything you wanna know. :P. Photos. loading. Networks. Enjin. enjin. com/profile/484567... Steam. PSN. Evinreeder. Xbox Live. Skype. EvinreederX." The second result is "About Me - Profile - Guilds, Clans, Minecraft, 0x10c, GW2 ..." with a URL "www.enjincraft.com/profile/4845672/info" and a description "Enjin. enjin.com/profile/484567... Steam. Playstation Live. Xbox Live. Skype. EvinreederX. Twitter. twitter.com/@EvinReed. Facebook. Google +. Youtube. Twitch." At the bottom, a note states "In order to show you the most relevant results, we have omitted some entries very similar to the 2 already displayed. If you like, you can repeat the search with the omitted results included."

"skype: evinreederx"

Web Shopping Images Videos News More Search tools

2 results (0.46 seconds)

Did you mean: **skype: finder**

No results found for "skype: evinreederx".

Results for **skype: evinreederx** (without quotes):

Profile - Minecraft Guild Clan Website Hosting ... - Enjin
www.enjin.com/profile/4845672/info//album_id/254927
Ask meh anything you wanna know. :P. Photos. loading. Networks. Enjin. enjin. com/profile/484567... Steam. PSN. Evinreeder. Xbox Live. **Skype. EvinreederX.**

About Me - Profile - Guilds, Clans, Minecraft, 0x10c, GW2 ...
www.enjincraft.com/profile/4845672/info
Enjin. enjin.com/profile/484567... Steam. Playstation Live. Xbox Live. **Skype. EvinreederX.** Twitter. twitter.com/@EvinReed. Facebook. Google +. Youtube. Twitch.

*In order to show you the most relevant results, we have omitted some entries very similar to the 2 already displayed.
If you like, you can repeat the search with the omitted results included.*

As you can see in the picture, this targets Skype username has been posted on his enjin profile leading to his Minecraft IGN, Steam, PSN, Xbox Live, Google +, Youtube, Twitch, Facebook and Twitter. You can use this same method for emails and other social media.

Now, let's find the IP under a Skype username, this is extremely easy, however some people might have a Proxy/VPN and or VPS enabled so you would get the IP of that, which is useless instead of the targets real IP.

Go onto <http://google.com> and type in the following in the search bar: **skype resolver**

I will be using <http://resolvethem.com> to resolve a Skype username, you can use any one you want but I recommend this one since it's usually online 24/7.

The screenshot shows the 'Resolve' page of the website. At the top, there is a section labeled 'Resolve' with a sub-label 'Username'. Below this, a text input field contains the username 'evinreederx'. A blue 'Submit' button is positioned below the input field. Underneath the button, a green box displays the resolved IP address '166.216.133.210'. Below this section is a table titled 'Recent Resolves'.

ID	Skype Username	Output
188476	evinreederx	166.216.133.210
188475	Live:darkman2606	Could not resolve the specified user.
188474	cafardeglise	
188473	warez34080	82.235.127.162
188472	cafardeglise	87.100.92.91

You will then be provided with the IP of the Skype username, you will learn how to get information from an IP Address in the next chapter.

If a resolver doesn't work download Commview or Cane & Able and call the target and it will grab the targets personal IP Address.

This method is probably what you will be using the most. It is what most professional Doxers use. Keep in mind you can do other searches then just Skype. For example "facebook: name" or "steam: name" It will just find where that name has been posted. It comes in handy.

Chapter 4

HOW TO FIND INFORMATION FROM AN IP

Now that we have the IP of our target we can then proceed to grab information from that.

Go onto <http://google.com> and type in the following in the search bar: **ip look up**

I will be using <http://whatsmyip.com/ip-lookup> to pull up information from an IP, you can use any one you want but I recommend this one since it's usually accurate. City is usually not correct.

General IP Information

IP: 98.19.31.228
Decimal: 1645420516
Hostname: h228.31.19.98.dynamic.ip.windstream.net
ISP: Windstream Communications
Organization: Windstream Communications
Services: None detected
Type: [Broadband](#)
Assignment: [Dynamic IP](#)
Blacklist:

Geolocation Information

Country: United States 
State/Region: Kentucky
City: Ashland
Latitude: 38.4795 (38° 28' 46.20" N)
Longitude: -82.6602 (82° 39' 36.72" W)
Area Code: 606
Postal Code: 41101

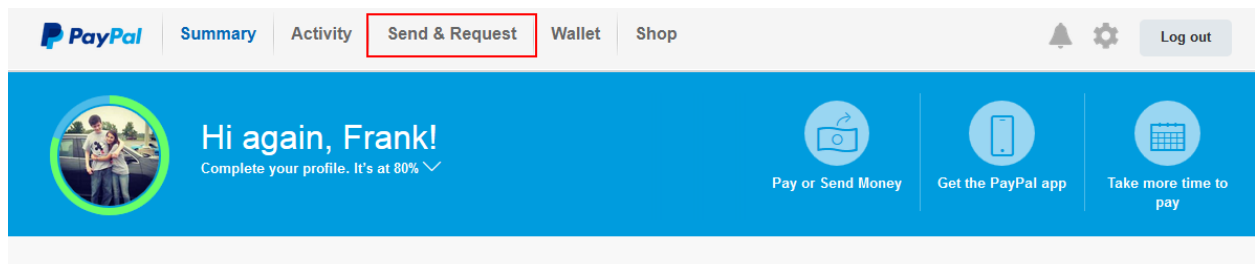

To ISP DOX call up their ISP and act like a worker and convince them to give you INFO. Not going to say my method, just google some since this eBook will obviously get leaked.

Chapter 5

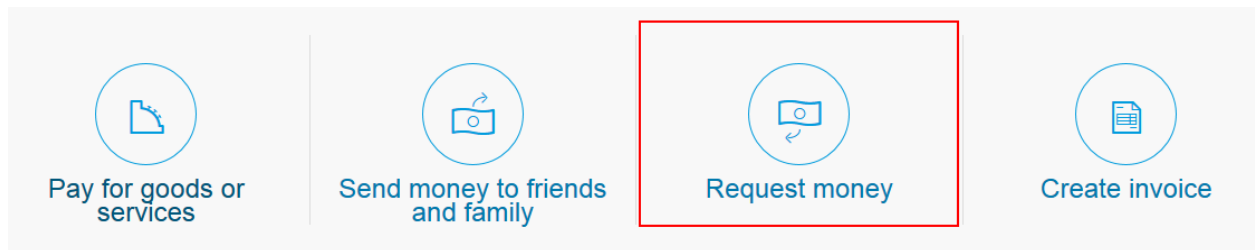

HOW TO FIND INFORMATION FROM AN EMAIL (CONNECTED TO PAYPAL)

Let's say you have an Email connected to this targets PayPal, well you can grab the name associated with the account very easily, I will show you an example below.

You need to have a PayPal account to do this, simply login and go to **"Send & Request"**

Once you've went to Send & Request then proceed and click on **"Request Money"**

Now that you have click that you will be brought to a page asking for an Email and a Price. Enter both and Click **"Next"** then **"Request Money"**

A screenshot of the PayPal 'Request money' form. The title 'Request money' is at the top. Below it is a paragraph: 'You can request money from anyone with an email address, even if they don't have a PayPal account.' There are two input fields: one for an email address containing 'evin.reed@gmail.com' and another for a monetary amount containing '\$0.01' and a currency dropdown set to 'USD'. Below these fields is a blue button labeled 'Next'.

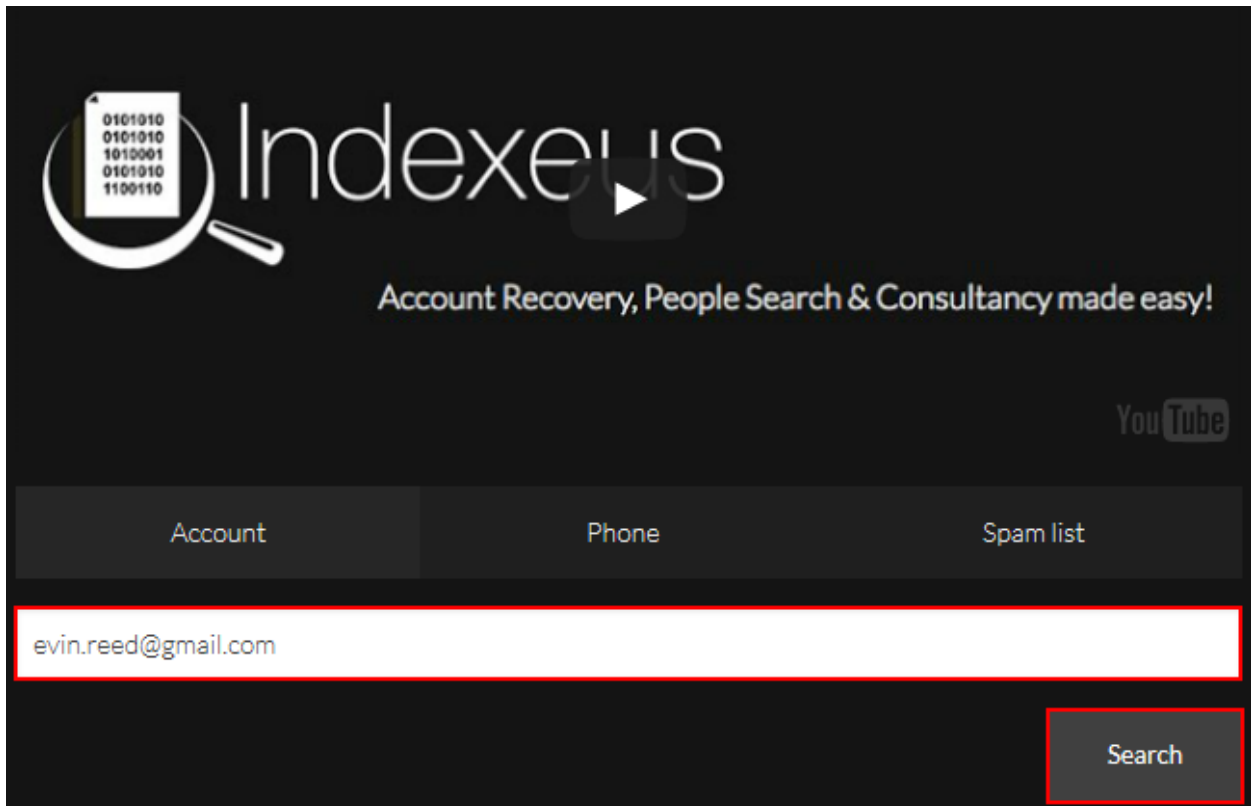

Finally, go home and the money request will be under pending payments with the targets full name.

Chapter 6

HOW TO FIND INFORMATION FROM A DATABASE

In this chapter you will learn how to pull information of a target from a leaked database. You can use anything. Emails, Skypes, an Alias, Names, IP, Address. ANYTHING. I will be using <http://indexeus.org> & <http://doxeus.com> for this. There are a lot more online search database's but these two are the best in my opinion.

Let's start with using indexeus, simply go to the website and type in whatever information you have into the search, for example I will be using an email.

The image shows the Indexeus website interface. At the top, there is a logo with a magnifying glass over a document containing binary code (0101010, 0101010, 1010001, 0101010, 1100110) and the word "Indexeus". Below the logo, the tagline "Account Recovery, People Search & Consultancy made easy!" is displayed. To the right of the tagline is a "YouTube" logo. Below these elements is a navigation bar with three tabs: "Account", "Phone", and "Spam list". Under the "Account" tab, there is a search input field containing the email address "evin.reed@gmail.com". To the right of the input field is a "Search" button. The entire interface is set against a dark background.

Once you entered the information, whatever it may be just simply click "Search"
Do the same thing for <http://doxeus.com> it's the same process.

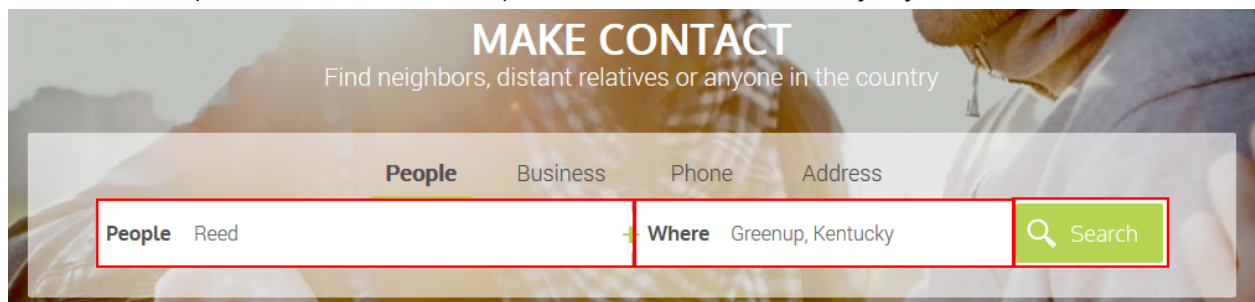

Please note, not everyone is in a public database.

Chapter 7

HOW TO FIND AN ADDRESS WITH A NAME OR PHONE NUMBER

For this method to work the target must be 18 years of age or older, if not just use the last name to find their parents. If you have the First and Last name of your target you are going to need a State and a city if you have it but not required, just makes it easier. The websites to do this are <http://whitepages.com> & <http://spokeo.com> there is a lot more but those two are the best.

Simply go to one and type in the targets First name if you have it and the last name of the target (must have a last name) then enter the State or city if you have that.

Once you entered the information simply click **“Search”**

Once you’ve found your target simply click **“View Full Profile”** and their address and phone numbers should be provided most of the time.

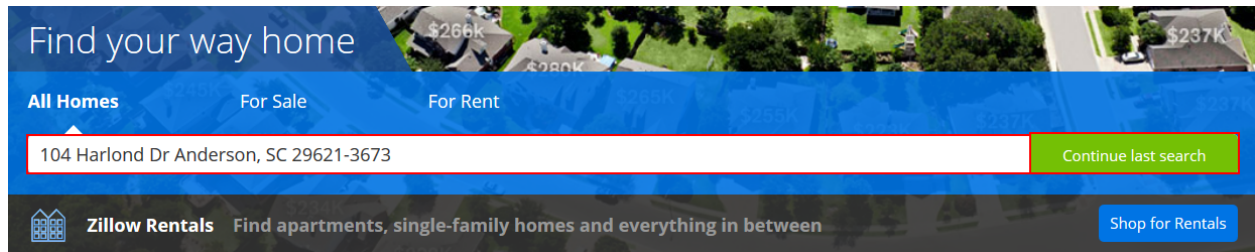

If you have the Phone Number of the target simply go to whitepages homepage and click the **“Phone Tab”** and enter the phone number.

Chapter 8

HOW TO FIND INFORMATION ON A HOUSE

Finding information on a house is probably the easiest thing to do in this whole eBook. Simply take the address you want info on and go to <http://zillow.com>

Now, enter the FULL Address and click the “Search” Icon.

A screenshot of the Zillow website's search interface. At the top, there's a banner with the text "Find your way home" and an aerial view of a suburban neighborhood with house price tags like "\$266k", "\$280K", and "\$237K". Below the banner is a navigation bar with tabs: "All Homes" (which is selected and has a small white triangle above it), "For Sale", and "For Rent". Underneath the tabs is a large white search input field with a red border, containing the text "104 Harlond Dr Anderson, SC 29621-3673". To the right of the input field is a green button labeled "Continue last search". At the bottom of the search bar area, there's a dark grey bar with the "Zillow Rentals" logo and text "Find apartments, single-family homes and everything in between", and a blue button labeled "Shop for Rentals" on the right.

Find your way home

All Homes For Sale For Rent

104 Harlond Dr Anderson, SC 29621-3673

Continue last search

Zillow Rentals Find apartments, single-family homes and everything in between

Shop for Rentals

Chapter 9

WHAT TO DO WITH A DOX

You can do a lot with a DOX, however most people just use them to scare people and never do anything, I will be listing some things you can do but not all since that will be considered blackhat.

Once again I don't take responsibility for what you do with the DOX you created.

- Pizza Bombing - Simply go to <http://dominoes.com> and order pizza to their house.
- Swatting - Only faggots do this.
- Craigslist Bomb - Go on <http://craigslist.com> and post a thread saying you're giving everything away for free and post the address of the target.
- Sending Boxes - Register an account on <http://ups.com> then simply go to the free boxes order and put in their information. I usually send around 2000 boxes to the targets house.
- Service Bomb - You pretty much call in to the neighborhood services and say you need a car washed, lawn mowed or anything.

If you want to know more about what you can do, let me know, I can't discuss it in this.

~ Made by zeroday, don't leak or a report will be filled.
