## Method 1

---

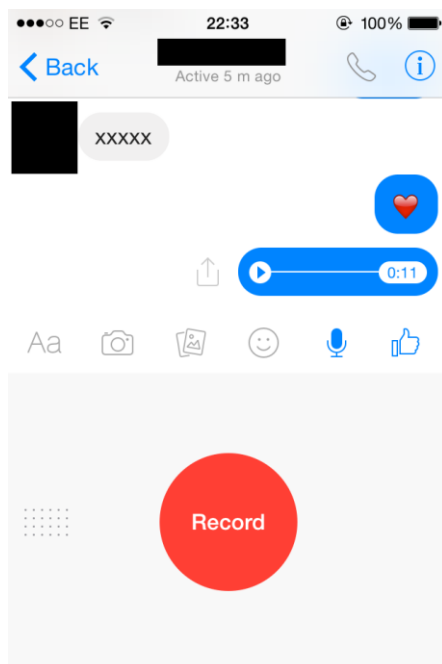

Method One is pretty easy in my opinion and all that it consists of you using is your mobile and common sense. As we all know, you can message people using your voice on the Facebook Messenger App using the Microphone add in, pretty much – just read what is said below to a pretty girl via the Facebook messenger application.

*“Hey baby – I don’t know if anybody has told you this but your pretty as hell and I’m sure surprised that you haven’t got a boyfriend. Do you wanna go out sometime beautiful? Just the two of us?”*

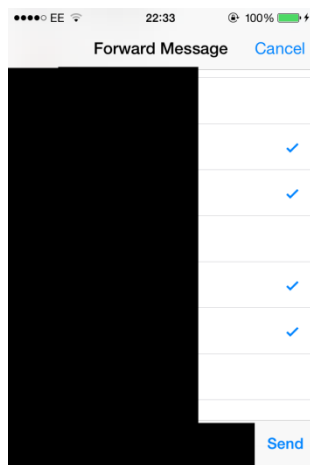

The reason why I’ve chosen the words above is because females don’t like to be called “hot” or “sexy” anymore due to stupid feminists but love being called beautiful or pretty. This will get their pussy dripping in no time. However, once you’ve done that – follow the steps below to gain the ultimate pussy access.

### Steps

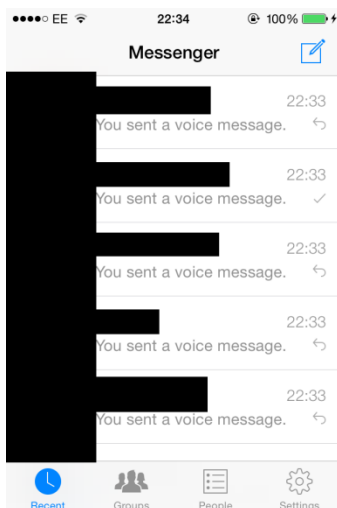

Step 1: Send the voice note to one female from your Facebook friends list.

Step 2: Press the arrow button next to the voice note and forward it to all females on your friends list.

Step 3: Watch as the same voice note gets sent to multiple females on your friends list.

Step 4: Sit down and wait for the dripping gash to come to you.

Please note: Even though this Method is flawless, it will not work on lesbians or girls with boyfriends/husbands.

Take Caution if you do send it to somebody with a boyfriend/husband – the responsibility is not mine it is yours.
