A refund will cause in a scam report. When you purchase my product, I will have all of your information from your PayPal.
Note that I don't want you to take this as a threat. I just wanted you to be more alarm of what people may do if you refund their product for the fun of it.

Do not leak or resell this product <u>ever</u>.
 If you leak this e-book it will just backfire on you and the people buying this product later on.

Alright let's get in to the book!

Chapters

Introduction

ALRIGHT! For a starter I would like you to know that this e-book doesn't need any particular requirement, especially not an **investment**. Ugghhh admit it, you have never liked that word even if it would mean you would get a profit of it.

Well anyway let's get in to what will be in this e-book.

We will be using a website called AddMeFast.

You might wonder, "What is AddMeFast?"

AddMeFast is basically a website where you earn points by Liking pages or videos on a lot of different type's social media.

So let's say you have 300 points. That would be an equivalent of around 20-40 Youtube likes. The reason it ranges so much is because you decide how much people should get for every view, like, etc. It's a very easy process that I will go through for you guys.

Requirement

Now, what you will be needing for this e-book is the following:

- AddMeFast Bot Suite v4.2.2
- 5 minutes of your life
- Patience
- NO INVESTMENT (optional)

I'm going to leave this chapter alone since I will be going through these requirements throughout the e-book

Setup

Part 1: Register
First things first you want to register at AddMeFast.

Registration
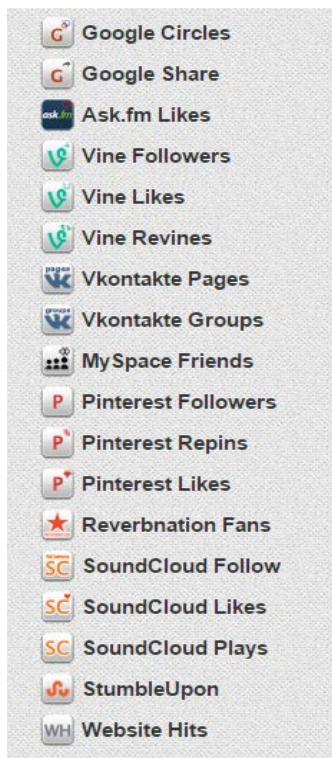

Your Email:

                Enter your real email address

Fill out the forms,
Agree to the terms of service and validate your email.

Part 2: Earning points

After you have registered there will be a long bar of different types of social media that you would like to earn your credits on.

I recommend using "YouTube Subscribers" as the main income for the points you will be earning.

Reason is you cannot get banned for subscribing a lot of channels under a short period of time.

(Not recommended)
You can also buy points for yourself if you really don't want to wait or you're just too lazy.

Part 3: Bot Setup

This e-book will also include an AMF bot with a custom script for your guys that will like or comment everything for you. But feel free to do this manually. The bot is at Mediafire

First up, press on the "AMF setub.bat" When you open up the .bat it will show you a .txt where you will get some instructions.

PATCH UPDATE: Youtube Like bot does not work
anymore. No worries though, all the other services are
working perfectly fine.

Step 4: Bot manual

After you've achieved the previous steps, open up "Start AMF Bot Suite V4.2.2".

After opening up the file, this will show up:

The left of the picture you can see the different types of social media for your bot to well…..bot.
Note: You will have to log in to the website you want to bot manually.

Now leave your bot overnight. You will probably get around 7 000 points if nothing goes wrong. I had my bot open for around 48 hours.

Welcome! You have **22628** points

Step 5: Add your social media (final step)

Let's get in to the main reason we are here.

When you have got a fair amount of points, go to the homepage of the website and press **Add Site/Page**.

Now add your Instagram, YouTube and all your other social media.

<u>Conclusion</u>

So… What do we have to conclude?

After reading this e-book you should be able earn yourself probably over 1000 followers on Instagram within only 48 hours. That may seem a lot. Believe me, it's not.

Not only will you earn yourself a lot of new followers and likes, you can even sell your account later on.

Yes you can sell your account. You can sell your account for an easy $40 if you have 20 000 points. And if you read the whole e-book you will easily make yourself 20k points

GOOD LUCK
