How To Get Sexy Girls - A Spreading Guide

Disclaimer

This is for educational purposes, and I am not responsible in any way for your actions. All information below should be used at your own risk.

Prerequisites

Before we start, you will need:

- A RAT or a Keylogger
- A FUD (Fully UnDetectable) Server
- Preferably a VPN, but it's not required
- Patience

Step 1: Upload Site

First thing you'll need to do, is find a upload site that does **not** distribute to other virus companies, and that doesn't remove your files.

I personally use OneDrive (AKA SkyDrive). Sign up at this link, to get 7GB free storage. For more information on OneDrive, including how to get a direct download link, check this thread out: http://www.hackforums.net/showthread.php?tid=4141022

Other sites to use:
http://rghost.net/ - Good site with direct download, but usually removes your files after a while.
http://directxex.com - Not much experience with this one, I don't think it worked so well for me.

Step 2: Find a target

This one is really simple, but can require some patience.
Go to a site with model profiles, like http://chaturbate.com, and start looking through the profiles for an email address.

> Chaturbate Tip: Use Ctrl+/ to quickly go to next profile.

Once you have found one, or many, move on to the next step.

Step 3: Sending Emails

For this step, you will need an email spoofer.
There is many of these on the internet, but many get filtered as spam, so they are quite useless.

One that worked for me is http://anonymizer.in/fake-mailer/, although I do not like it. I didn't go through the struggle of finding a better one. You can of course find a better one if you'd like.

> Tip: Use a VPN when doing this, because I do not know if that site is safe.

This is where you need to get creative. I will show you what I do, but you are not limited to doing this.

My Method (Example template)

From: staff@image.site
To: your@sexy.girl
Subject: Unapproved pictures of you uploaded to our site!
Message:
Hello [name],

We here at [imagesite] found this album which contains your name and pictures of you.
We wanted to check if you approved these pictures or not.
Here is the download to the album: [your-server-download-here]

We have temporarily removed the pictures from our site, but if you do not respond within 48 hours, we will put them back up.

Best Regards,
[imagesite] Staff
[imagesite-url]

Step 4: Repeat Step 2 and 3 and wait…

That's it. Thank you for reading my first [noob-friendly] eBook! Please vouch on the thread if you think this was a good method.
