Virtual Goldmine

Getting Started:

First, you will need some decent starter cash. I recommend e-whoring, PPD, slice the pie, and any of my money making e-books. Do NOT think, "oh no I need money right now to do this", it will not make as much profit until you get started, but this method can make you bank. You are going to need money to keep this project going, once it is already started, your sales should easily keep you where you need to be to keep this method working and to possibly move on to bigger and better things. I recommend trying my grey hat IRL method that will be at the bottom of this e-book along with a Facebook spreading guide!

Here is the hard part:

Now that you have all the starter cash, what you're going to need is a Facebook bot that can create accounts, a bot that can join groups, and a bot that can post in the groups. I recommend having all of the bots spate because if they were to change one little detail it could possibly make it to where you have to get a completely new bot. I recommend paying a coder to make you these but you can easily get a mouse recorder that could temporarily get you by until you have enough money to afford a high end bot. Also you can try an autotyper. I use Gary's hood this combined with a mouse recorder like Axife should be able to make some money to afford a bot.

Facebook accounts:

So now you either have a bot or a mouse recorder that is capable of getting accounts to join and post in groups. Your next move will be obtaining accounts. There are a few different ways of getting them creating, buying, or stealing them. If you do not have the time or funding to get them I recommend stealing them by infecting lots of Facebook users. The person I work with has a very good method for Facebook spreading that can be found here http://www.hackforums.net/showthread.php?tid=3844581

I recommend getting as many accounts as you can because you will be able to make a lot more spam.
Everything is setup:

So now you have all of the above things completed you are either manually using Facebook to post spam or you are having a bot do it. So now you may be asked "what kind of spam?" You are going to setup a shop on Ebay, MPGH, and possibly other sites advertising that you can post peoples products and websites on XXX amount of Facebook groups with XXX amount of accounts. This is an amazing advertisement method that I have never seen sold ANYWHERE you will be running this market and be able to make bank from sales. So many people who do YouTube, Twitter, and Instagram own a website to make a product, and want to advertise ANYTHING will come crawling to you for your unique services!

Gray Hat IRL Method:

Most of you already know how easy it is to get Spotify, Netflix, Hulu+, and many other types of accounts or codes off of hack forums. What you are going to do is get as many of these as possible and start real life sales of these accounts. If you need to get a Netflix, adamgunpellet's sales thread goes for .10$. I have made over 50$ selling Netflix to people and I was not even doing it that long. When you first start sell them for about 20$ and just say you will do a life time refund so when they need a new account you will get them another. After a while slowly drop the price but continue to sell them. I recommend finding buyers over sites like Facebook and twitter that you know in real life.

Spreading Guide:

Start your own Facebook botnet by this simple Tutorial. How you will make this botnet/spreading. Let me explain it in a short drawing.

```
                            ┌──────┐
                            │ You  │
                            └──────┘
        ┌────────┬────────┬────────┬────────┐
   ┌───────┐ ┌───────┐ ┌───────┐ ┌───────┐ ┌───────┐
   │ Slave │ │ Slave │ │ Slave │ │ Slave │ │ Slave │
   └───────┘ └───────┘ └───────┘ └───────┘ └───────┘
```

In order to get this, you will have to make a group on facebook.

Nieuwe groep maken

Maak een gedeelde groep voor jou en een aantal vrienden, bijvoorbeeld de vrienden waarmee je naar de film gaat, vrienden uit je sportteam, je broers/zussen of vrienden van de boekenclub.

Groepsnaam: YourBotnet Name (Call it something like a giveaway or so)

Leden: Add your Friends (Targets)

Privacy:
○ Openbaar
Iedereen kan de groep, de leden van de groep en de berichten van de leden bekijken.

◉ Besloten
Iedereen kan de groep en de leden van de groep bekijken. Alleen leden kunnen de berichten bekijken.

○ Geheim
Alleen leden kunnen de groep, de leden in de groep en de berichten van de leden bekijken.

Add as much People as you can how more people is more slaves.

When you are done, send this group a group message with something like this,

"I'm giving away a free Xbox 360. To enter in the contest you have to click this link (Virus Link) and send it to all your friends. The link is basically a counting website. If you click on it we see your name in our database, so we can randomly generate the winner through Random.org (Expire Date)

Also tell them they have to send it to their friends to enter.

Now open your rat and wait until 100-1000s of slaves start coming up on your rat. You don't even have to crypt it. The best thing is to crypt it but you don't need to.

As you see in the picture below you see how this all works.

You are the hoster/creator of these slaves.

Your slaves are the persons in the group and the slaves in the group are the spreaders of their friends keep going.
