REVOLUTIONIZING HOW YOU MAKE MONEY ONLINE

THE ONLY EBOOK YOU'LL
EVER NEED!!

ISIDAR

INTRODUCTION

Hi there,

You are reading this because you have taken a HUGE step to making a great sum of money online by purchasing this eBook. I can promise you that you **WILL** earn money from the methods I have mentioned in this eBook and will support each and every one of you until you start seeing results from this eBook.

I have been making money online since I was fifteen years old and I have always found different methods to make money online, the recent ones being the ones which will be shared in this eBook.

This eBook will be talking about sites such as AdWorkMedia, MyLikes and Socibuzz in particular. I have used these sites to gain lumps of money and I am hoping you will earn as much as I do. You will be guided with a step-by-step process and I will clearly mention everything that is needed in order for you to understand the method and put them into practise. I've used images where necessary in order for you to get a better visualisation and understanding of the method in order to make it easier for you to comprehend.

Without further ado, let's get **CRACKING!**

MYLIKES

The screenshot shows the MyLikes website interface. At the top, the logo 'mylikes' is displayed with the tagline 'The largest advertising network for the people web'. A 'login' button is available for users who already have an account. Below the header, a central banner explains that MyLikes is a social media advertising platform for advertisers and social publishers. It offers two paths: 'Advertisers' and 'Social Publishers', separated by an 'OR' indicator. The 'Advertisers' path describes gaining traffic and awareness for a website, video, or app, with a green 'ADVERTISE ON MYLIKES' button. The 'Social Publishers' path describes engaging an audience by posting tweets, blog posts, and videos for advertisers, with a blue 'SIGN UP AS A PUBLISHER' button. Below this banner, statistics are shown: 481,922 Publishers and 3,435,644,047 Audience Reach. At the bottom, two sections titled 'Advertisers - How It Works' and 'Publishers - How It Works' provide step-by-step guides. The Advertisers section includes steps for creating a campaign, finding publishers, and paying for clicks. The Publishers section includes steps for finding campaigns, earning money, and getting paid weekly.

Advertisers - How It Works

- 1 Create a text or video campaign, describe your product or service and set a cost-per-click or view.
- 2 Social publishers create sponsored tweets and videos, based on your campaign specifics.
- 3 Pay only for the valid clicks and views that your campaign receives.

Publishers - How It Works

- 1 Find advertising campaigns you like and create sponsored videos, tweets, tumbls or blog posts.
- 2 Earn money each time you receive a click or view.
- 3 Get paid weekly with Paypal or Amazon gift cards.

MyLikes is one of the best ways to make money with CPC to date, it's THE largest advertising network out there and can earn you tons of money. This is where I made a ton of money, cashing out at least \$500 each and every week. The best part about MyLikes is they pay each Friday and they pay via PayPal or Amazon Gift Cards.

MyLikes pays you for each click that you gain. You can get these clicks in many ways such as Twitter and Tumblr. Unfortunately, MyLikes recently removed the use of getting clicks with Facebook. However, I have another site which allows clicks from Facebook so don't you worry.

The first step that you want to take is go to the MyLikes website, www.mylikes.com and then sign up as a Publisher.

In order to get the link which will get you the clicks, you will need to click “share text like”. This means you will have to link a Twitter account or something similar in order to get the link. It doesn’t matter that you don’t have followers because the method doesn’t require any.

When you push the “share text like” button, you will be greeted with this page. As you can see, you are given an estimated pay per click and you’re given a sample message which can be changed. This is important for the method because you need to write it so it will get people to click it. Now, this is where the method starts coming in. Something which you can do is change the text so something different and more click worthy such as “Check out what Channing Tatum did HERE (link)”. This is a great way to get more clicks because it will get people intrigued in what exactly he did and will click the link and will get the money flowing in.

Now, you might be thinking, HOW THE HECK AM I SUPPOSE TO GET THE CLICKS? I HAVE NO FOLLOWERS! Well, this is the beauty of the method, you don’t actually need followers yourself. You can actually outsource this part. Basically, you get the money from the clicks on YOUR link. The link for the advertising campaign never changes. This means once you get the link, you can post it around anywhere on Twitter to get the clicks and the money. So, my method is to either ask friends to retweet my tweet with the link or purchase

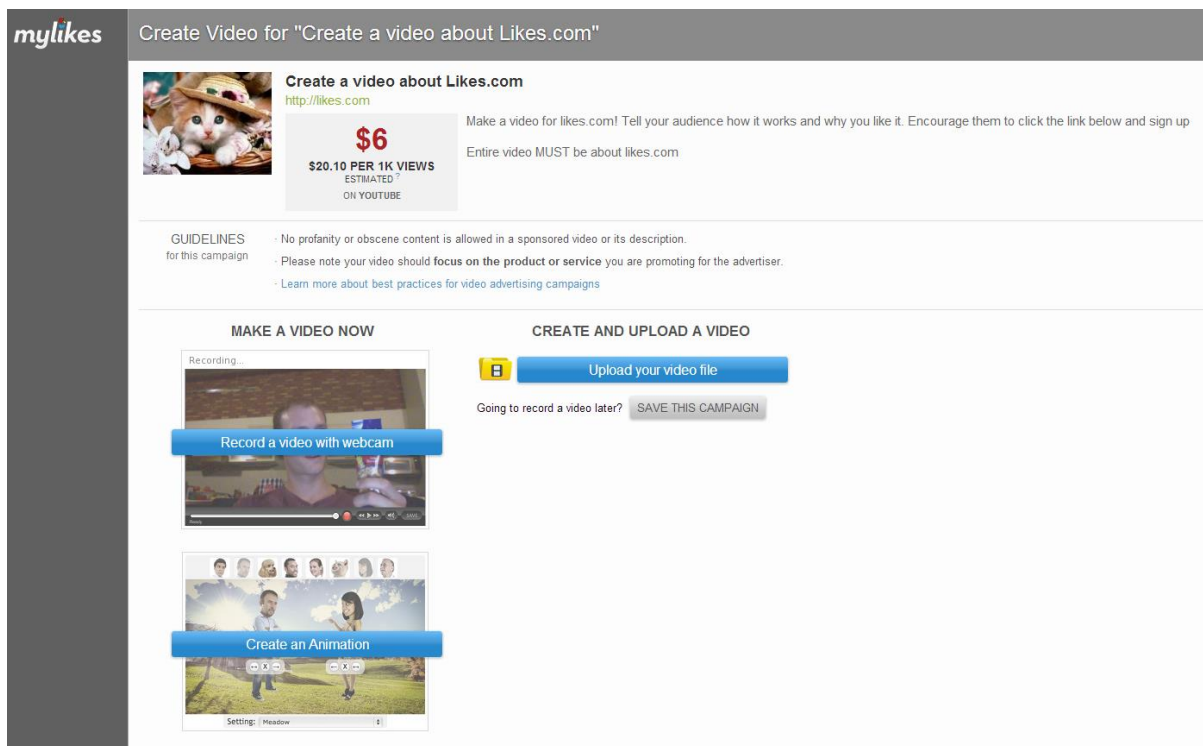

retweets or actual tweets. Obviously, for those of you who aren't looking to invest in this, the first option will be the best option for you. However, those looking to get some serious money from this can actually purchase tweets or retweets in order to gain a large amount of clicks, leading to a lot of money. There are several sites where you can purchase tweets, this include pay4tweets and there are several others. Just Google "Buy tweets", and you'll get a ton of results but pay4tweets is the best. The best way to find the best accounts to purchase tweets from are NOT from how many followers they have. What you should do is look through their tweets and if they have a link such as a goo.gl, bit link or something similar, put .info at the end of the link to find out how many clicks the link got. I have used an example below.

As you can see, you get the amount of clicks on the link in the past 24 hours which was a staggering 1,603. From this, you work out that it would cost \$20 to purchase the tweet, you subtract that from how much you make, for example, you were getting paid \$0.033/click and you got 1,603 clicks, it would equal \$52.89 which gives you a \$32.89 profit overall from just one link.

There is also another method I have to make money with MyLikes. This involves very little start-up money and can gain you a lot more money than you put into it. This method include MyLikes as well as Fiverr where we will be purchasing a specific gig.

Not only does MyLikes pay for clicks, it also pays for views, much like a YouTube Partnership, only the advertisers on MyLikes pay more, much more. Advertisers will pay for you to promote their site, their product or anything else for that matter. What you have to do is make the video yourself and post it on YouTube or outsource it and get someone from Fiverr to it for, well, \$5!

As you can see. The estimated pay per view is around \$20. However, you need to link your YouTube account and depending on how many subscribers you have, views etc. you can earn a lot more. For this example, I linked in a new account and will still earn \$6 per 1000 views. This advertiser on MyLikes wants a video made on likes.com. If you don't want to make the video yourself, you can go to Fiverr and outsource this.

Above is an example of a Fiverr gig which you can use for your video for MyLikes. You purchase the gig and tell them what you want reviewed or what you want a testimonial for, in this case, the likes website. Once you have done this, you go to MyLikes and upload your video file. Now the video is up, it's time to get views.

There are a lot of different methods to getting views, purchasing them isn't one of them. Instead, play games on Vagex and earn credits and get your views from there because they are real people with different IP addresses and it will count towards the view counter. You can also post your links on certain forums, Facebook Fan Pages etc.

SOCIBUZZ

The banner features the SociBuzz logo at the top center, with a bee character flying a paper airplane to the left. To the right of the logo are links for 'Sign Up' and 'Login', and social media icons for Facebook and Twitter. Below the logo, a blue banner asks 'WHAT IS SOCIBUZZ?'. The main text states that SociBuzz.com is now accepting traffic from various social media platforms and offers a 'SIGN UP' button. It explains the monetization process for publishers and advertisers. Socibuzz is a site very similar to MyLikes but in my opinion is now better which I'll be explaining in more detail a little later on. Socibuzz works exactly the same as MyLikes but it has more social networking sites that can be used in order to gain links such as Facebook which is one of the best ways to get clicks and earn cash. As you can see, Socibuzz is still in the beta stage yet it has almost 10,000 publisher and over 23 million clicks in total, staggering!

The same as MyLikes, the first thing you want to do is to sign up to the website.

The register form is titled 'Register Form' and has a blue background. It includes a link to 'Login Register'. The form fields are: 'First Name*', 'Last Name*', 'Email*', 'Password*', and 'Repeat Password*'. Each field has a corresponding white input box. At the bottom left, there is a blue 'Register' button.

Once you have registered to Socibuzz, you will see all the campaigns available to post just like with MyLikes.

The screenshot displays the Socibuzz user interface. At the top is a navigation bar with links for Home, Account, Help, Affiliate Program, and Advertiser. Below this, the user's profile section includes a nickname edit link, a headline edit link, and a website edit link. To the right of the profile are three stat boxes: 'Earned this Period' showing \$0.00, 'Total Reach' showing 0, and 'Publisher Rate' showing 52.50%. Below the profile are social media connection buttons for Twitter, Facebook, LinkedIn, and MySpace. A 'Recent Activity' section lists recent earnings from various sources like 'Hot New Market!', 'For Sale Or Swap', and 'Kate Middleton'. The main section is titled 'Publisher Opportunities' and shows a list of campaigns. Each campaign entry includes an image, a title, a description, accepted networks, geo-targeting, and a 'Promote' button. The estimated price per click (CPC) is also displayed for each campaign.

Campaign Name	Description	Networks Accepted	Geo Targeting	Estimated CPC
Pradaxa	Get paid help people that have been affected by a potentially dangerous drug.	Facebook	United States	\$0.053
FreebieAvenue Twitter Campaign	Looking for free samples, freebies, deals, or coupons? Freebie Avenue is just the place you have been looking for! We've got it covered!	Twitter	United States	\$0.042
Travel Deals (Twitter Only)	Promote Travel Deals On Twitter and Make BANK!	Twitter	United States	\$0.026

As you can see, the layout between MyLikes and Socibuzz is very similar. You're given the campaign, the price per click, a short description of the campaign and the promote/share button.

Like we did with MyLikes, in order to get the sharing link, you need to click the promote button. You then have the option to choose what social network you want to share the link on, the majority on Socibuzz is Facebook which is a good thing which I'll go into a little later. You click the Facebook icon and then proceed to the next step.

You're then given the entire text and link which you need to copy and you're done, you need to start getting those clicks in order to earn some cash!

The screenshot shows the SociBuzz website interface. At the top, there is a navigation bar with links for Home, Account, Help, Affiliate Program, and Advertiser. The main heading is "Post Campaign 'Pradaxa' on Facebook". Below this, there is a section for the campaign details. On the left, there is a biohazard symbol. To the right of the symbol, the text reads: "Pradaxa", "Description: Get paid help people that have been affected by a potentially dangerous drug.", "Networks Accepted: Facebook", and "Geo Targeting: United States". To the right of the description, there are two boxes: one showing "\$0.053 Per Click (Estimated)" and another showing "\$0.00 Total Earnings". Below the campaign details, there is a section for "Choose Post for" with a dropdown menu set to "facebook". Below this, there is a text box containing the text: "Pradaxa has caused over 500 deaths in the US, if you or a relative has taken Pradaxa, you may be entitled to compensation". Below the text box, there is a "Terms" section with a text area containing the text: "I agree to post this link on a Facebook page that belongs to me. I am posting this link at my own risk since Facebook.com does not allow 3rd party advertisement links per their terms and conditions. By posting this link, I agree to all SociBuzz.com terms and conditions." Below the text area, there is a checkbox labeled "I Agree" which is checked. At the bottom, there are two buttons: "Generate Facebook Link Code" and "Cancel".

Now, with the promotions that can be shared through Twitter, you can use the method I used for MyLikes. However, due to the fact that Socibuzz allows promotion through Facebook, Facebook would be the best social network to use in order to gain those clicks.

Now, there are two ways in which you can get these clicks, by spending money or getting them for free. One of the ways you can get the clicks for free is to post on Facebook fan pages which allow their fans to post status updates. You can also post in on your own Facebook page so your friends can click the link. Due to the fact that you have the link, Socibuzz will have to pay out for links you post anywhere. This is good because it means you can post some comment on new, popular YouTube videos relating to the video. An example of this would be if you were watching a fitness video, you could write in the comments, "check out this awesome 1000lbs deadlift (link)". Comments which aren't true for some reason and thumbed up a lot by

people for some strange reason and the links get a lot of clicks. If you implement this, this will be getting you money without having to invest.

The no investment options work very well but to increase your earnings, even spending \$5-\$10 can earn you a huge profit margin. You can purchase Facebook status update pages on fan pages with a lot of fans for around \$10 and it will gather you A LOT of clicks and WILL give you a big profit. If you have quite a bit of money to invest, I strongly recommend renting Facebook fan pages where the owner of the fan page will make you a content creator for a week/month etc. and you can post status updates on the page yourself.

Getting back to posting status updates either on your own Facebook page or on a Facebook fan page, the best way to go is either false advertising or just have a funny image with the Socibuzz link. What I mean by this is choosing any campaign on Socibuzz, getting the link but changing the text to something completely different. For example:

Check out this video of Justin Bieber getting punched: (link)

This will gain a lot of clicks and will result in you making a lot of profit if you paid for the status update or pure profit if you posted it

on your own timeline. I HAVE implemented this technique when MyLikes allowed Facebook to be used to gain clicks and this was my results after 15 minutes:

I used the meme image about Justin Bieber with exact same text and it got me \$60 in just 15 minutes. I paid \$10 for the status update and made overall \$85 from the post, resulting in a \$75 profit from just one status update.

Now, if you are looking to purchase the status updates on Facebook fan pages, you can look on Hack Forums, Blackhatworld, DigitalPoint and Warrior Forum.

If you want to look on Hack Forums, just type in “Facebook Fan Page”, or “FB Status Updates” or something along those lines and you’ll find someone who is. You can also do this on the other sites mentioned, especially Warrior Forum.

However, there are a lot more people willing to sell status updates on Digital Point and Blackhatworld.

In order to find them on these two sites, these are links to get the status updates:

<http://forums.digitalpoint.com/forumdisplay.php?f=90&s=669f7b8023eb0db2db35eb874427b26d>

The above link is to the advertising section in Digital Point.

<http://www.blackhatworld.com/blackhat-seo/f86-facebook/>

The above link is where people talk about Facebook on BlackHatWorld, A TON of people ask the same question, “How do I monetize my Facebook fan page”, you PM them and say you will pay

for a status update on their page for \$10 or so. Please NOTE that you should not post you want to buy status updates in that section, instead, you can do that in the link provided below.

<http://www.blackhatworld.com/blackhat-seo/f92-want-buy/>

The above link is where you can post you want to buy status updates on Facebook Fan Pages. You can post something like this:

Hi guys,

I am looking to purchase Facebook status updates on fan pages which should have a lot of US fans. I am looking to purchase at least one status update and depending on the amount of fans you have, prices I will pay will vary.

Never forget that the fan pages must be made from US fans as a majority.

The methods I have given you can also be put in practise for other forms of money making such as PPD in order to get downloads with sites such as Share Cash.

ADWORKMEDIA

We now move on from CPC and move onto CPA. I will be mentioning CPA with social networking sites again and this can be done with any CPA network, it doesn't need to be AdWorkMeda.

Using this method, I have earned myself a decent amount of money. I haven't actually done much CPA with social networking sites such as Facebook and Twitter due to the fact that I have had huge success with CPC, earning an average of around \$1,500 per week from MyLikes and Socibuzz alone. However, saying that, I have managed to monetize using CPA too and know results are to be made as long as you select the right offer which matches the fan page/twitter account you're going to use to advertise the CPA offers.

NOTE: I will not mention how to get accepted into AdWorkMedia, I will help you one-to-one with this.

I purchased a post on the following fan page for \$12, www.facebook.com/iimityv. I can get you posts on this page if you would like to take action after reading my eBook. As you can see from the posts already on the page, its humour, gaming, music etc. It doesn't have just one niche. I chose a music related niche which can also be considered as a giveaway niche. Here are my results from one post which I asked to be removed after just 2 hours to see results for just 2 hours.

3238	BBR - Studio Beats by Dr. Dre (Submit)	350	26	\$1.10	\$28.60	7.43%	\$0.08	 
------	--	-----	----	--------	---------	-------	--------	---

I paid \$12 for the post and made \$28.60 after 2 hours. This wasn't the best campaign I could have used on the page either, I have had more success with other pages like gaming fan pages and used a gaming campaign.

Here is how I posted the campaign on Facebook:

As I have mentioned, the best campaigns I have found to be successful are the gaming related campaigns. Campaigns where you install a game are very successful, especially when promoting it correctly. If you decide to use Facebook, you should search for gaming related fan pages, either ask for a free post or look on Black Hat World, Warrior Forum or Digital Point and purchase posts on fan pages.

Another method of getting clicks which will lead to installs, downloads, email submissions etc. is more of an uncommon method, Google Alerts. This method is great because you can use it to promote links for free that you get from Socibuzz and you can also use it for your CPA offers as well as PPD links too!

Google Alerts is a way to monetize new content posted on the internet, whether it's a blog post, a forum post, a news article, you will be alerted on the search result that you choose. The reason why this is great is because when and if you get alerted of a new news

article relating to, for example. Gaming downloads, the article will be reviewed by thousands of people as you can choose to be alerted by only the best results, meaning the best websites. This will give you the chance to post links in the comments, it will give you the chance to be the first commenter and get thousands of people seeing your links and potentially clicking on them. This can be used for links from Socibuzz where you can get paid for each click you'll get. You can also use it for your CPA campaigns, just post a relevant campaign and watch the conversions stack up like crazy. You could also do this for PPD, again by posting the link to your download with a description.

A prime example of this could be if you selected to be alerted for something like Black Ops 2. If a forum thread/post or an article is released, you will be alerted as soon as it is published. You can then go to the link and then post a link, for PPD it can be download Black Ops 2 for free and include your download link.

You might be thinking, I can just search for your niche and post the comments when you find something suitable right? Well, you won't be the first commenter on the forum thread or news article so you won't get anywhere as near as many clicks as you would get if you were the very first commenter. As I've mentioned, the great part about this method is it can be used for all types of monetizing techniques.

Here is what you need to fill in to get the Google Alerts. I used "game downloads" as an example:
