

## EZ-MONEY

In this eBook you're going to learn how I turned my \$10 Investment into over \$100+ in pure profit everyday! Let's get straight into this...

First step we are going to look for an aged Domain.

Factors that need to be considered when searching for your Domain:

Age Must Be At Least 1 Year Old

Must have at least 100 Backlinks or a PageRank

There are many ways to find a Domain with these requirements, but i am going to share with what i use on a daily basis.

My TOP choice is a website called Expired Domains

[Click Here](#)

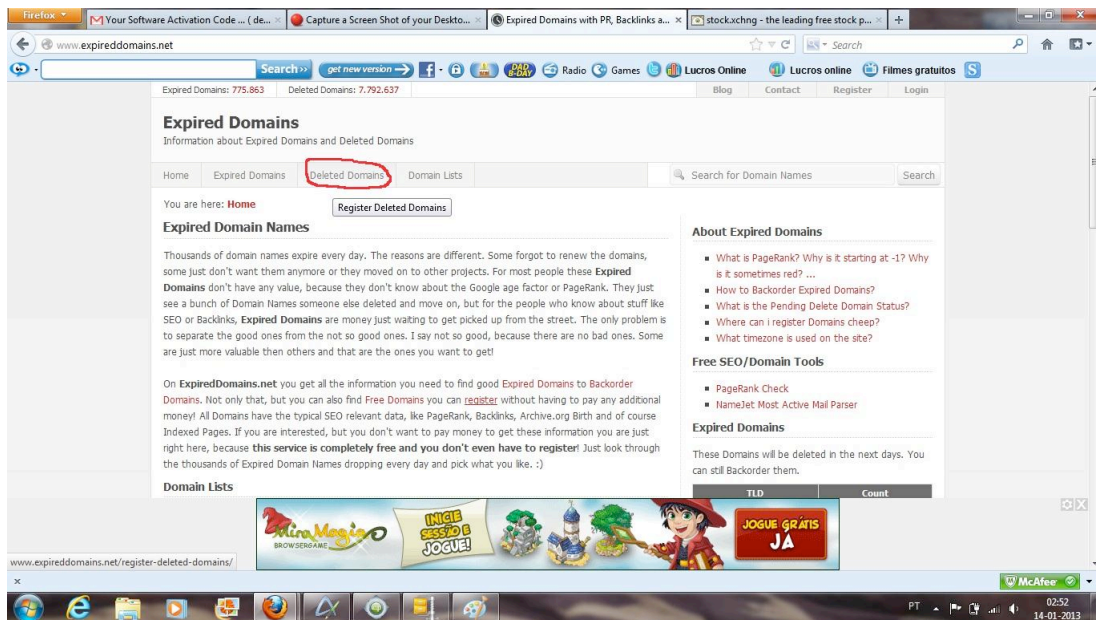

This is a free Domain checker and its a «Gold Mine!»

You can join for free or just check the site without registering.

The advantage of registering is that you will find thousands more expired domains to search for.

Once on the site click on deleted Domains

Then Choose Your Extension - Note that for my blueprint to work any extension will work!

Once you have clicked on your chosen extension,

left click on

BK - Backlinks or PR –  
PageRank

Expired Domains: 775.863 Deleted Domains: 7.792.637

### Expired Domains

Information about Expired Domains and Deleted Domains

Home Expired Domains Deleted Domains Domain Lists Search for Domain Names Search

Deleted Domains: [com](#) | [net](#) | [org](#) | [info](#) | [biz](#) | [de](#) | [asia](#) | [mobi](#) | [tv](#) | [cc](#) | [us](#) | [ca](#) | [me](#) | [se](#) | [nu](#) Expired Domains: 775.863 Deleted Domains: 7.792.637

You are here: [Home](#) > [Deleted Domains](#) > [Deleted .com Domains](#)

The domains below are just a **small portion** of the full list. You get all domains, more data, more filters and a lot more features in the free Memberarea.  
Read more about What you can find in the Memberarea that you can not find here.

show filter

**Evitar a ingestão de 5 Alimentos**  
Reduza um pouco da sua barriga diariamente evitando a ingestão destes 5 alimentos. [nunca comer](#)

Now , here's something people don't  
realize....

I have found a few Domains that were marked as  
registered, but in fact they were available to purchase!

So when choosing your Domain, make sure it has at least  
1000 backlinks, or a Pagerank 1+

If you are lucky you might even find a domain that  
has both of these!

Ok So now you must double check to see if the  
Domain you have chosen is available.

I register all my domains at Godaddy, its Free to join and  
easy to manage your account.

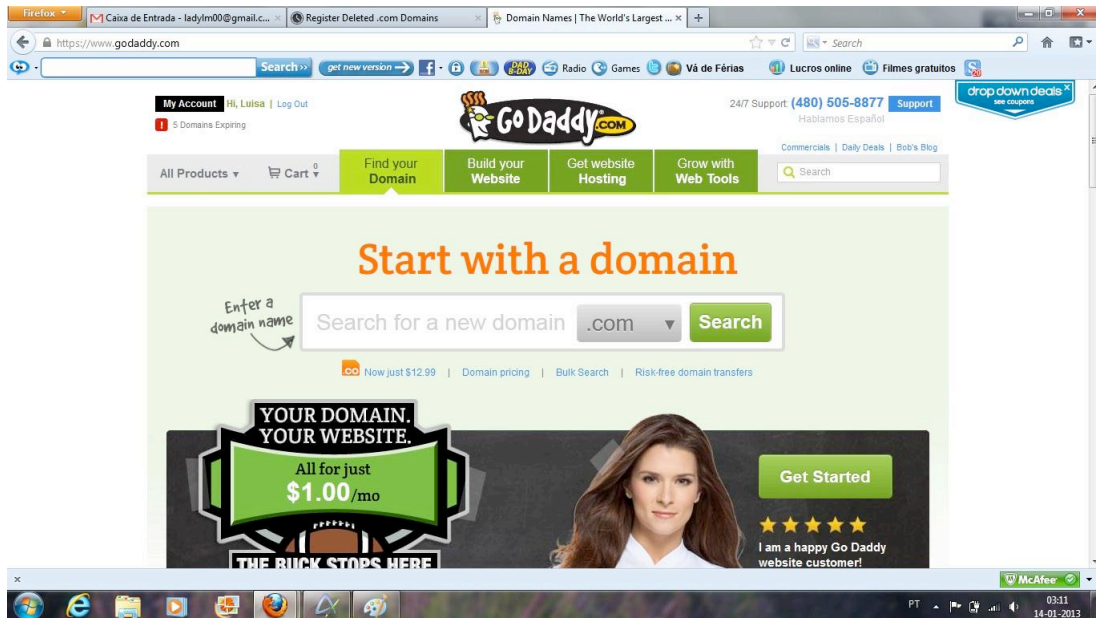

[Click here to sign up](#)

Paste or type in your desired domain, if its available

Click on add

Go to check out and pay!

There you have your Domain, ready to go to the next stage!

Now we need to add this Domain to your Hosting account.

I use Hostgator, very easy to work.

This service will cost you \$7.99 a month for the Baby Plan, and you can add unlimited domains!

[Go here if you need a hosting account](#)

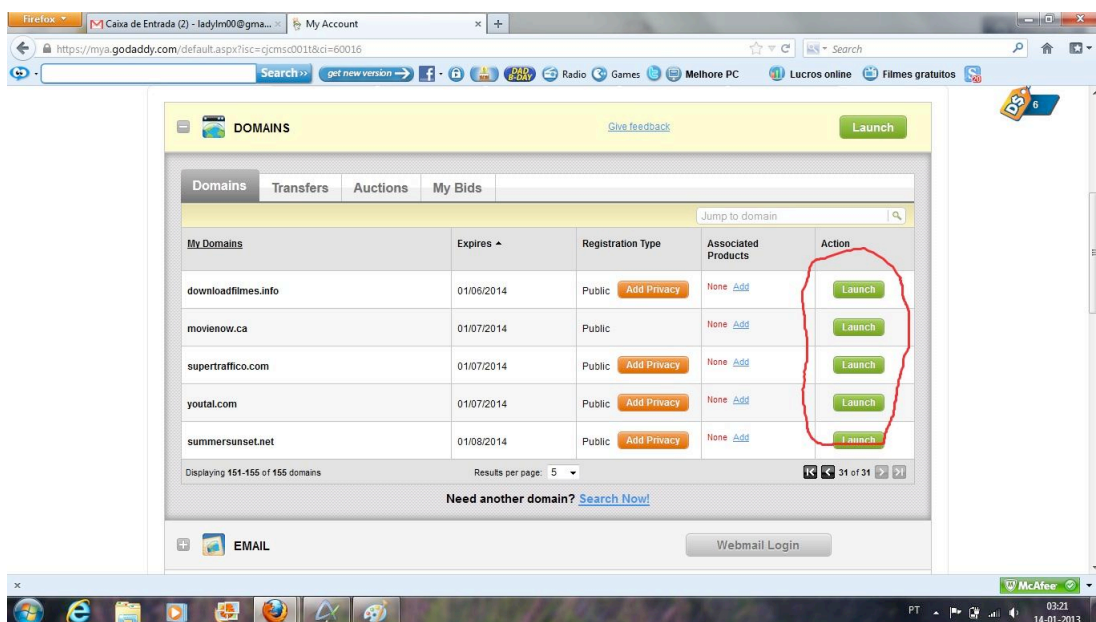

Now that you have added your Domain, we will need to change the name servers on your domain. Nameservers will be given to you once you have signed up for hosting.

All Hosting providers, send a Welcome email with all your details.

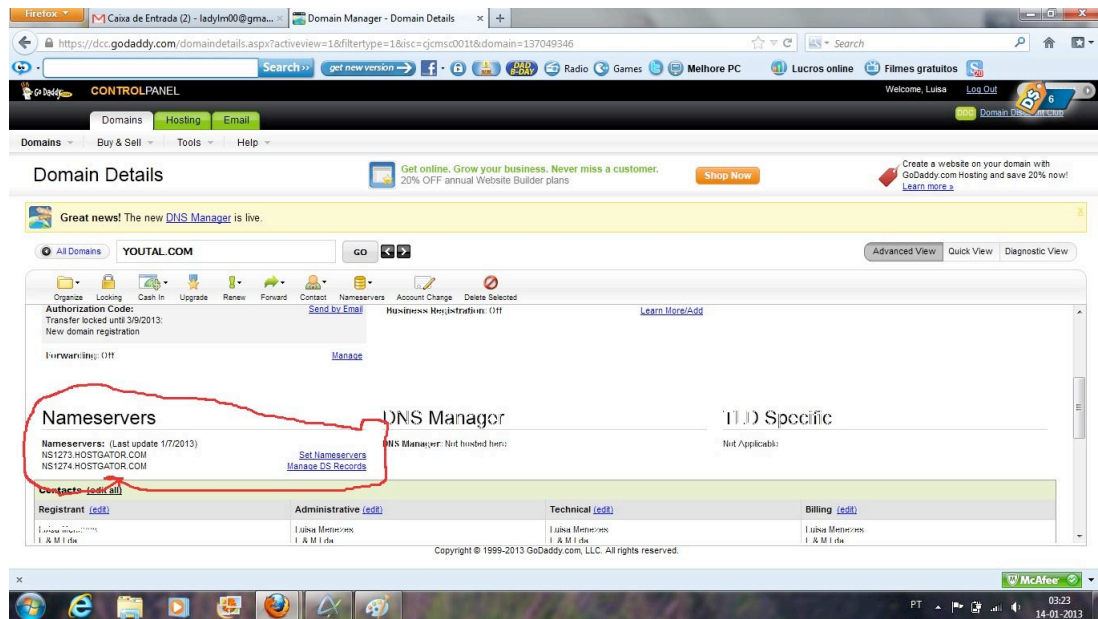

Log back into your Godaddy account, click on My Account....

Then Click on Domains

Once you see your chosen Domain click on Launch

Your Domain manager will open, scroll down to the bottom and click on set nameservers

You will then have 4 options: I

want to park my domains.

I want to forward my domains.

I have a hosting account with these domains. I

have specific nameservers for my domains.

Click on the highlighted one and input your nameservers, save and then close!

That's it!

So let's recap:

Well done by this stage you have found

Your domain,

registered it,

added hosting,

changed nameservers

and now you are ready to go to the next parte!

## Heart Of The Blueprint

Depending on your chosen domain, you will need to find  
a ready to go website, or even better create your own!

If you are not good at creating websites (like me)  
you can easily do a Google search for

Turnkey Websites

Free Turnkey Websites

Alternatively you can always check on the Warrior Forum in the Websites For Sale section.

Head over to JVZOO.com, they sometimes have people selling Turnkey Websites at a great price!

Also Ebay is a great place to look, I've bought cheap websites for no more than \$3!

If you do buy a ready made website, make sure you have all rights, that means you can upload the files to any number of domains!

Now I'm not going into uploading websites, you can find tutorials about this all over Youtube.

But if you really need help, I will offer my support! ;)

Kick-Start Step!!

Recap 2:

Found a Domain

Registered Your Domain

Added you Domain to Hosting account

Changed nameservers

Uploaded your Website Files

**FINAL ROUND!!!!**

Now let's Sell your Website!

And....

**Make Some MONEY!**

There are many places where you can sell your website, but i only work with the Best 2!

They are...

# Flippa and Ebay

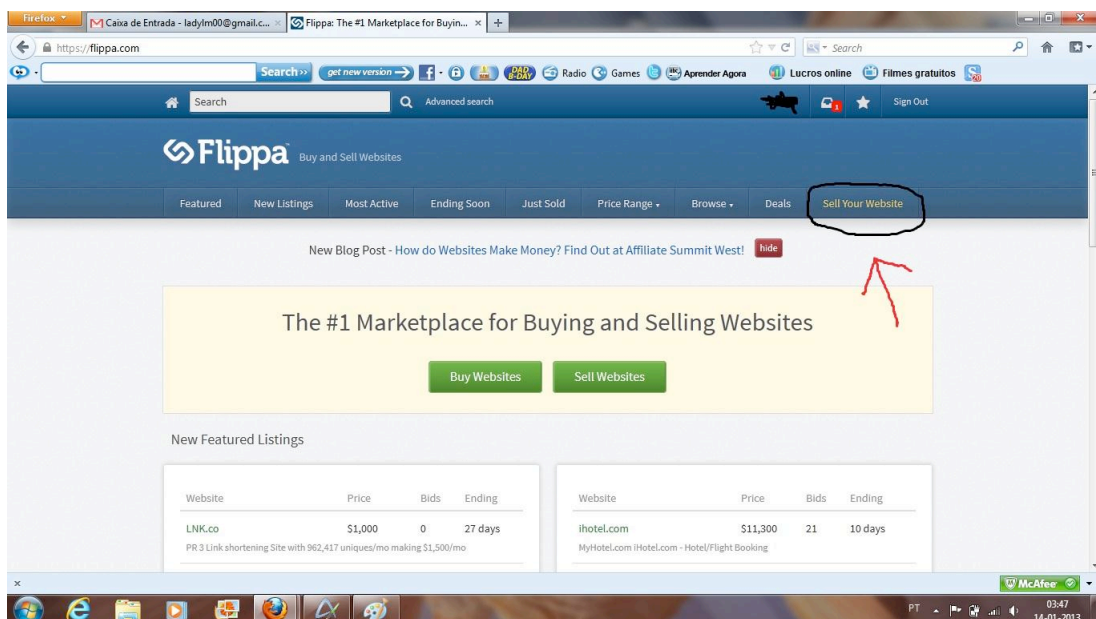

Let's Start with my TOP choice

## Flippa:

You must register a FREE account

[Go Here](#)

After you register, log into your account and click on  
Sell Website

Input your Domain and start to create your auction

Fill out all the necessary steps

You must make an eye catching title

ex: « Aged Domain with 2863 backlinks, ready to make money with an amazing website No reserve!!!»

In the pitch ALWAYS give as much details and information as possible.

Tel them it's a dropped domain

what year it was created how

many backlinks it has what

pagerank it has Explain

about the website

how can they make money?

etc

It's always a good thing when starting out on Flippa, to include a BONUS for the winner of the auction,

this will attract hungry buyers and call attention to the auction.

Bonus can be anything, you can download load of free stuff online, it might be a free E-book or Software, etc you get the idea...!

As you move forward listing your auction, I've found it best to list it with a NO Reserve.

this means that the auction will start at the asking price and any bid could win

List your auction for 5 days, this is more than enough to sell it for a reasonable price.

As you are starting out on Flippa, i do suggest you keep you BIN - Buy It Now \$100 - \$150

Then when you start to get Good feedback and a Good reputation, you can higher the BIN

2x, 3x,5x or 10x its up to you!

The new Fees for Flippa have made it possible to sell a new website and make a good profit.

All new websites are only \$9 to list and their  
commission for success fees are 15%

So keep in mind what we are spending on each  
auction:

Domain \$10

Listing \$9

Total of \$18 ONLY!!!

So in order for you to make profit, the site must sell for  
over \$28, everything after that is your Profit!

Say you sell you site for \$100, you will make \$67  
Profit - as Flippa will take their fee of 15%

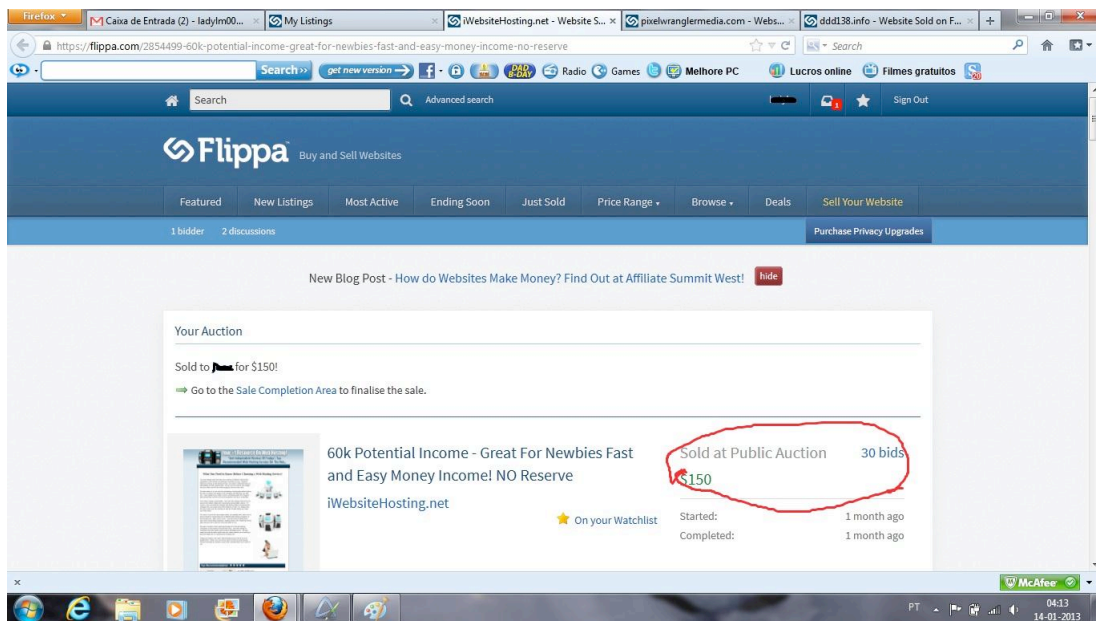

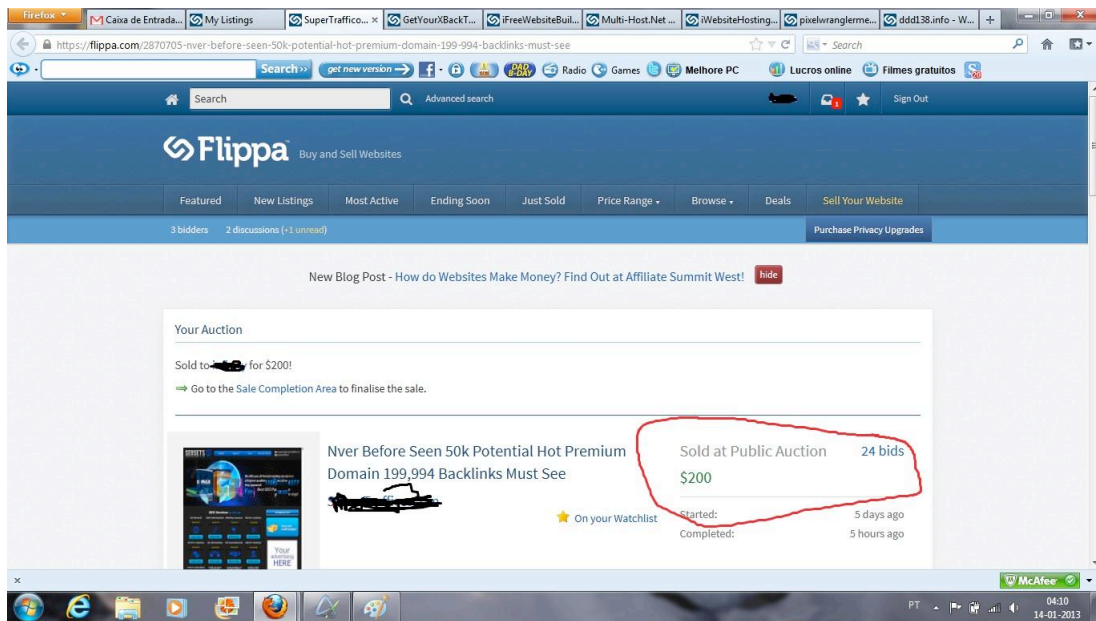

Now say you create 7 of these babys a week.... !!! Now, if

you website dosent sell, you can re-list it for  
half the fee, which they charge \$5

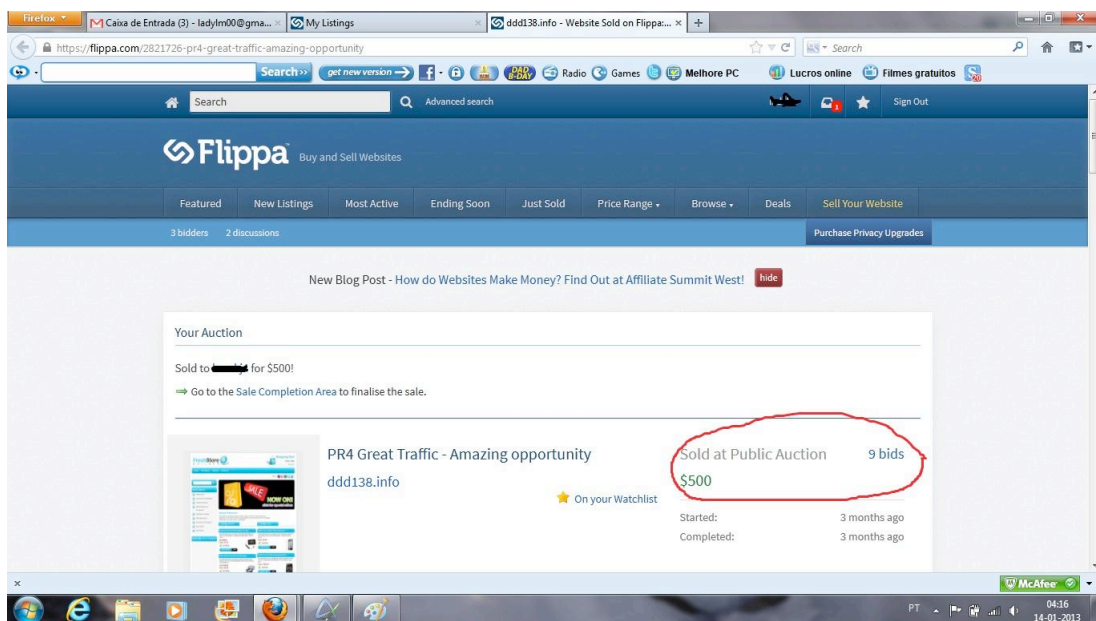

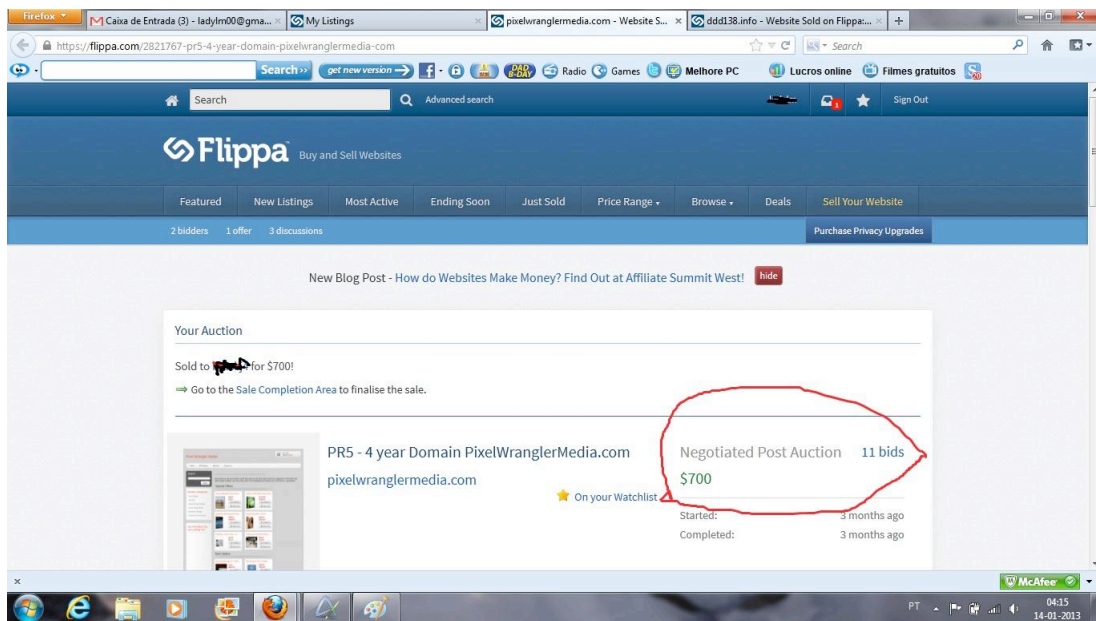

This is a betting system, some you win some you lose!

But never give up

Here are some of my screen shots just to prove to you:

Ebay:

Now Ebay is an easy way to sell lots of stuff online

Just the same way to list you auction on Flippa!

Start your listing at say...\$25, if it sell, great! If not.. just re-list it dosent cost you anything!

Conclusion:

Selling Websites can be a tricky game, but the bottom line is... It WORKS!

If you take action you will succeed!
